DIN EN 1096-1:2012-04 (E)

Glass in building - Coated glass - Part 1: Definitions and classification

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5
3.1 Product definition 5
3.2 Definitions of luminous, solar and thermal properties 7
3.3 Definitions of appearance defects 8
3.4 Symbols 8

4 Description of additive methods of deposition 9
4.1 Chemical film formation processes: 9
4.2 Physical film formation processes 9
4.3 Other processes 10

5 Glass substrates 10
5.1 Basic glasses 10
5.2 Special basic glasses 10
5.3 Processed glasses 10
5.3.1 Strengthened glasses 10
5.3.2 Thermally toughened safety glasses 10
5.3.3 Laminated glasses 11

6 Luminous, solar and thermal properties 11
6.1 General 11
6.2 Spectrophotometric properties 11
6.2.1 General 11
6.2.2 Ultraviolet range 11
6.2.3 Visible range 11
6.2.4 Solar range 12
6.2.5 Thermal range 12
6.3 Tolerance on determined properties 12

7 Classification of coated glass 13

8 Appearance 13
8.1 General 13
8.2 Detection of defects 14
8.2.1 General 14
8.2.2 Artificial sky 14
8.2.3 Daylight illumination 14
8.3 Conditions of examination 14
8.3.1 General 14
8.3.2 Uniformity defects and stains 16
8.3.3 Punctual defects 16
8.4 Acceptance criteria of coated glass defects 16

9 Product information 17
9.1 General 17
9.2 Additional information 17

Annex A (informative) Example of presentation of coated glass properties 18

Bibliography 19
