Thermal performance of windows, doors and shutters - Calculation of thermal transmittance - Part 2: Numerical method for frames

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions and symbols	1
4	Calculation method	2
4.1	General principle	2
4.2	Validation of the calculation programme	3
4.3	Determination of the thermal transmittance	3
5	Treatment of solid sections and boundaries	3
5.1	Solid materials	3
5.2	Emissivity of surfaces	3
5.3	Boundaries	4
5.4	Roller shutter boxes	4
5.5	Extensions of window frame profiles	6
6	Treatment of cavities	6
6.1	General	6
6.2	Cavities in glazing	6
6.3	Unventilated air cavities in frames and roller shutter boxes	6
6.4	Ventilated air cavities and grooves	10
7	Report	11
7.1	General	11
7.2	Geometrical data	12
7.3	Thermal data	12
7.4	Results	12
Annex A (informative) Thermal conductivity of selected materials		13
Annex B (normative) Surface resistances		15
Annex C (normative) Determination of the thermal transmittance		17
Annex D (normative) Examples for the validation of calculation programmes		21
Annex E (informative) Wood species listed in Annex A		33
Bibliography		36
