

ISO 16331-1:2012-05 (E)

Optics and optical instruments - Laboratory procedures for testing surveying and construction instruments - Part 1: Performance of handheld laser distance meters

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Symbols and abbreviated terms		1
5 General information		3
5.1 General		3
5.2 Target reflectivity		3
5.3 Background illumination		3
5.4 Temperature of key components		3
5.5 Atmospheric influence		3
5.6 Display resolution		3
5.7 Average deviation and uncertainty of measurement		3
5.8 Relevant contribution to uncertainty		4
5.9 Instruction for instrument specifications		4
6 Test procedure for determining the compliance with accuracy specifications		4
6.1 Test concept		4
6.2 Requirements		4
6.3 Configuration of check points		5
6.4 Measurement procedure		5
6.5 Calculation of deviations and uncertainty of measurement		6
6.6 Statement of test result		9
7 Test procedure for determining compliance with range specifications		10
7.1 Requirements		10
7.2 Description of measurement procedure		10
7.3 Calculation of deviation and uncertainty of measurement		10
7.4 Statement of test result		11
Annex A (informative) Example of performance specification		12
Annex B (informative) Examples of determining compliance with accuracy specifications		13
Annex C (informative) Examples of determination of compliance with range specifications		26
Annex D (informative) Background illumination simulation		30
Annex E (informative) Target plates		32
Annex F (informative) Typical characteristics of natural targets		33
Bibliography		35
