Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions and symbols 6
3.1 Terms and definitions 6
3.2 Symbols 8

4 Equipment 8
4.1 General 8
4.2 Test section support system 9
4.3 Measuring tube 9
4.4 Isolation of the test section 9
4.5 Measuring and recording devices 9
4.6 Additional equipment 10
4.7 Calibration 10

5 Planning of geohydraulic investigation and testing 10
5.1 General 10
5.2 Selection of testing locations 11
5.3 Selection of test procedure 11

6 Preparation of the test section and installation of equipment 18
6.1 Requirements for drilling and the test sections 18
6.2 Installation of filter 19
6.3 Checking installation 19
6.4 Safety requirements 19
6.5 Decommissioning 19
6.6 Factors influencing the test results 20

Annex A (informative) Examples of possible test section isolation and support methods 22

Annex B (informative) Examples of shape factors 28
