DIN EN 14227-5:2013-08 (E)

Hydraulically bound mixtures - Specifications - Part 5: Hydraulic road binder bound granular mixtures

Contents

Page

Foreword 4

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Symbols and abbreviated terms 7

5 Constituents 8
5.1 Aggregates 8
5.2 Hydraulic road binder 8
5.3 Water 8
5.4 Retarders 8

6 Hydraulic road binder bound granular mixture 8
6.1 Types 8
6.1.1 Hydraulic road binder bound granular mixture 1 8
6.1.2 Hydraulic road binder bound granular mixture 2 8
6.1.3 Hydraulic road binder bound granular mixture 3 9
6.1.4 Hydraulic road binder bound granular mixture 4 9
6.2 Water content of mixtures 9
6.3 Proportioning of the constituents, grading and dry density 9
6.4 Other requirements for the fresh mixture 10
6.4.1 Compacity 10
6.4.2 Immediate bearing index of the mixture 10
6.4.3 Workability period 10

7 Laboratory mechanical performance classification 10
7.1 General 10
7.2 Classification by compressive strength 11
7.3 Classification by Rt, E 12
7.3.1 General 12
7.3.2 Method by direct tensile testing 12
7.3.3 Method by indirect tensile testing 12
7.3.4 Method by indirect tensile and compression testing 12

8 Other requirements for the mixture 13
8.1 Strength after immersion in water 13
8.2 Other characteristics 13

9 Production control 13

10 Designation and description 13
10.1 Designation 13
10.2 Description 14

11 Marking and labelling 14

12 Figures 15

Annex A (normative) Compacity of a hydraulic road binder bound granular mixture 2 20

Annex B (informative) Production control for hydraulic road binder bound granular mixtures 21

B.1 General 21
B.2 Quality manual 21
B.3 Organisation 21
B.3.1 Responsibility and authority 21
B.3.2 Management representative 21
B.3.3 Internal audits 21
B.3.4 Management review 22
B.3.5 Sub-contract services 22
B.3.6 Records 22
B.3.7 Training 22
B.4 Control procedures 22
B.4.1 Production management 22
B.4.2 Composition of the mixture 23
B.4.3 Constituents 23
B.4.4 Process control 23
B.4.5 Inspection, calibration and control of process equipment 23
B.4.6 Handling and delivery 24
B.5 Inspection and testing of constituents and mixtures during production 24
B.5.1 General 24
B.5.2 Characteristics that require control during production 24
B.5.3 Frequency of sampling the mixture 24
B.6 Inspection and testing equipment 25
B.6.1 General 25
B.6.2 Measuring and testing equipment 25
B.6.3 Measuring and testing equipment in the process 25
B.6.4 Measuring and testing equipment in laboratory 25
B.7 Non-conformity 26
B.7.1 General 26
B.7.2 Non-conformity of constituents 26
B.7.3 Non-conformity of the mixture 26
