## Fire tests for building elements and components - Fire testing of service installations - Part 3: Single component penetration seals - Guidance on the construction and use of test configurations and simulated services to characterise sealing materials

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>2</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>2</b>
<b>4</b>	<b>Test equipment .....</b>	<b>3</b>
<b>5</b>	<b>General performance criteria .....</b>	<b>3</b>
<b>6</b>	<b>Guidance on test configurations and procedures .....</b>	<b>4</b>
<b>7</b>	<b>Test procedures .....</b>	<b>4</b>
7.1	Test configuration A -- Size of unsupported free area of penetration seal .....	5
7.2	Test configuration B -- Thermal diffusivity of the conductor / penetration .....	6
7.3	Test configuration C .....	7
7.4	Test configuration D -- When multiple simulated services are being tested .....	8
7.5	Test procedure E .....	8
7.6	Test procedure F .....	8
7.7	Test procedure G .....	9
7.8	Test procedure H .....	9
<b>8</b>	<b>Deriving the field of application by judgemental analysis .....</b>	<b>9</b>
8.1	Analysis using test configuration A .....	9
8.2	Analysis using test configuration B .....	9
8.3	Analysis using test configuration C .....	10
8.4	Analysis using test configuration D .....	10
<b>9</b>	<b>Deriving the field of application by mathematical analysis .....</b>	<b>10</b>
9.1	Use of the 3-D interpolation method to predict the extended field of application .....	10
<b>Annex A (informative) Determining the extended field of application .....</b>		<b>12</b>
<b>Annex B (informative) Example of the application of the principles of 3-D interpolation to the establishment of the extended application of penetrating sealing system .....</b>		<b>13</b>
<b>Annex C (informative) 3-D interpolation method of analysis .....</b>		<b>16</b>
