

# DIN CEN/TR 16349:2012-11 (E)

Framework for a specification on the avoidance of a damaging Alkali-Silica Reaction (ASR) in concrete; English version of CEN/TR 16349:2012

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1 <b>Scope</b> .....		5
2 <b>Alkali-Silica Reaction (ASR)</b> .....		5
3 <b>Elements of specifications</b> .....		5
4 <b>Characterisation of environment</b> .....		5
5 <b>Precautionary measures appropriate to concrete</b> .....		6
5.1 <b>General remarks</b> .....		6
5.2 <b>Use of cement with a low effective alkali content</b> .....		7
5.3 <b>Use of slag, fly ash, silica fume or other pozzolana (in cement or as an addition)</b> .....		7
5.4 <b>Limiting the effective alkali content of the concrete</b> .....		7
5.5 <b>Verification of the suitability of a concrete mix in a performance test</b> .....		8
5.6 <b>Use of a non-reactive aggregate combination</b> .....		8
6 <b>Summary</b> .....		8
Bibliography .....		9
