ISO 12631:2012-10 (E)

Thermal performance of curtain walling - Calculation of thermal transmittance

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions, symbols and units 2
3.1 Terms and definitions 2
3.2 Symbols and units 3
3.3 Subscripts 3
3.4 Superscripts 4

4 Geometrical characteristics 4
4.1 Main principles 4
4.2 Internal depth 6
4.3 Boundaries of curtain wall structures 6

5 Cut-off planes and partitioning of thermal zones 9
5.1 Rules for thermal modelling 9
5.2 Cut-off planes of the geometrical model 9

6 Calculation of curtain wall transmittance 9
6.1 Methodologies 9
6.2 Single assessment method 10
6.3 Component assessment method 16
6.4 Thermal transmittance of a curtain wall built of different elements 21

7 Input data 21

8 Report 22
8.1 Section drawings 22
8.2 Overview drawing of the whole curtain wall element 23
8.3 Values used for calculation 23
8.4 Presentation of results 23

Annex A (informative) Guidance for calculating the thermal transmittance Ucw of curtain walling using the two methods 24

Annex B (informative) Linear thermal transmittance of junctions 25

Annex C (normative) A method for calculating the thermal effect of screws using a 2D numerical method and the procedures specified in ISO 10077-2:2012 33

Annex D (normative) Ventilated and unventilated air spaces 36

Annex E (informative) Component method: Calculation example 39

Annex F (informative) Single assessment method: Calculation example 45

Annex G (normative) Parallel routes in normative references 48

Bibliography 49
