DIN EN 13374:2013-07 (E)

Temporary edge protection systems - Product specification - Test methods

Contents

Page

Foreword 4

1 Scope 6

2 Normative references 6

3 Terms and definitions 8

4 Classification of edge protection systems 10
4.1 Class A 10
4.2 Class B 11
4.3 Class C 11

5 Requirements 11
5.1 General 11
5.1.1 Basic requirements 11
5.1.2 Nets 11
5.1.3 Principal guardrail 11
5.1.4 Toeboard 11
5.2 Additional dimensional requirements for individual classes 12
5.2.1 Edge protection system class A 12
5.2.2 Edge protection system class B 12
5.2.3 Edge protection system class C 12
5.3 Material requirements 13
5.3.1 General 13
5.3.2 Steel 13
5.3.3 Timber 14
5.3.4 Material for counterweights 14
5.4 Static and dynamic design requirements for individual classes 14
5.4.1 General 14
5.4.2 Edge protection system class A 14
5.4.3 Edge protection system class B 14
5.4.4 Edge protection system class C 14

6 Structural design 15
6.1 General 15
6.1.1 Introduction 15
6.1.2 Method of design 15
6.1.3 Ultimate limit state (fundamental and accidental loads) 16
6.1.4 Serviceability limit state 16
6.2 Partial safety factors 16
6.2.1 Ultimate limit state with fundamental loads 16
6.2.2 Serviceability limit state 17
6.2.3 Ultimate limit state with accidental loads 17
6.3 Static loads 17
6.3.1 General 17
6.3.2 Serviceability limit state 18
6.3.3 Ultimate limit state - Point loads 19
6.3.4 Ultimate limit state - Maximum wind load 20
6.3.5 Ultimate limit state -Load combination 21
6.3.6 Ultimate limit state - Load parallel to the edge protection system 22
6.3.7 Ultimate limit state with accidental loads 22

7 Test methods 23
7.1 General 23
7.2 Load application 23
7.3 Sample to be tested 24
7.4 Tests for conformity with static load requirements for classes A and B 24
7.4.1 General 24
7.4.2 Tests for serviceability 24
7.4.3 Test for strength 25
7.5 Tests for conformity with dynamic load requirements for classes B and C 25
7.5.1 Test procedure for Class B 25
7.5.2 Test procedure for Class C 27
7.6 Test reports 29

8 Designation 29

9 Marking 29

10 Information to be given to the site 30
10.1 General requirements 30
10.2 Principal contents 30

11 Assessment 31

Annex A (informative) Appropriate classes for the use at different inclinations and falling heights . 32
