DIN EN 14080:2013-09 (E)

Timber structures - Glued laminated timber and glued solid timber - Requirements

Contents

Page

Foreword 6

1 Scope 10

2 Normative references 10

3 Terms and definitions 11

4 Symbols 17
4.1 Main symbols 17
4.2 Subscripts 18

5 Requirements for glued laminated products 19
5.1 Mechanical resistance of glued laminated timber 19
5.1.1 General 19
5.1.2 Timber 19
5.1.3 Related material properties 19
5.1.4 Verification from classification of standardised beam lay-ups and lamination properties of glued laminated timber 20
5.1.5 Verification from cross sectional layup and properties of boards and finger joints 24
5.1.6 Verifications from full scale tests with glued laminated timber 26
5.1.7 Resawn glulam 26
5.2 Mechanical resistance of glued solid timber 28
5.2.1 General 28
5.2.2 Timber 28
5.2.3 Related material properties 28
5.2.4 Verification from classification of lamination properties of glued solid timber 28
5.2.5 Verifications from full scale tests with glued solid timber 29
5.3 Additional requirement for mechanical resistance of glulam with large finger joints 30
5.4 Additional requirement for mechanical resistance of block glued glulam 30
5.5 Bonding strength and durability of bonding strength of glued laminated products 30
5.5.1 General 30
5.5.2 Species 30
5.5.3 Adhesives for the production of glued laminated products 31
5.5.4 Finger joints in laminations 33
5.5.5 Bonding of laminations 33
5.5.6 Bonding of large finger joints 35
5.5.7 Bonding of block glued glulam 35
5.6 Durability of other characteristics against biological attack 35
5.6.1 Glued laminated products without preservative treatment 35
5.6.2 Glued laminated products with preservative treatment 35
5.7 Resistance to fire 35
5.8 Reaction to fire 36
5.9 Formaldehyde emission 37
5.10 Release/content of other dangerous substances 37
5.11 Deviation in sizes 37
5.11.1 Maximum deviations 37
5.11.2 Corrected sizes and moisture deformation factor 39

6 Evaluation of conformity 40
6.1 General 40
6.2 Initial Type Testing 40

6.2.1 General ... 40
6.2.2 Test samples, testing and compliance criteria ... 41
6.2.3 Test reports ... 46
6.3 Factory production control (FPC) ... 46
6.3.1 General ... 46
6.3.2 Requirements ... 47
6.3.3 Product specific requirements ... 52
6.4 Initial inspection of factory and of FPC ... 53
6.5 Continuous surveillance of FPC ... 54
6.6 Procedure for modifications ... 54

7 Marking and labelling ... 54
7.1 General ... 54
7.2 Glued laminated products ... 54
7.3 Additional for glulam with large finger joints ... 55

Annex A (normative) Release of Formaldehyde ... 56

A.1 General ... 56
A.2 Classification ... 56
A.2.1 Glued laminated timber or glued solid timber ... 56
A.2.2 Classification for glulam with large finger joints and block glued glulam ... 57

Annex B (normative) Additional test methods and requirements for adhesives ... 58

B.1 General ... 58
B.2 Long-term sustained load test at cyclic climate conditions with specimens loaded perpendicular to the glue line for moisture curing one-component polyurethane and emulsion polymer isocyanate adhesives ... 58
B.2.1 General description ... 58
B.2.2 Production of the specimens ... 58
B.2.3 Test procedure and climate conditions ... 59
B.2.4 Requirements ... 60
B.2.5 Report ... 60
B.3 Delamination test for finger joints in laminations ... 60
B.3.1 Production of the specimens ... 60
B.3.2 Testing ... 61
B.3.3 Results ... 61
B.3.4 Report ... 61

Annex C (normative) Delamination test of glue lines ... 63

C.1 Principle ... 63
C.2 Apparatus ... 63
C.2.1 Pressure vessel ... 63
C.2.2 Drying duct ... 63
C.2.3 Balance ... 63
C.2.4 Metal wedge and hammer ... 63
C.3 Sampling and preparation of test pieces ... 63
C.4 Procedures ... 64
C.4.1 General ... 64
C.4.2 Measurement and evaluation of delamination ... 64
C.4.3 Test cycle for method A ... 65
C.4.4 Test cycle for method B ... 65
C.4.5 Test cycle for method C ... 66
C.5 Results ... 66
C.5.1 General ... 66
C.5.2 Total delamination ... 66
C.5.3 Maximum delamination ... 66
C.6 Report ... 67

Annex D (normative) Shear test of glue lines ... 68

D.1 Principle 68
D.2 Apparatus 68
D.2.1 Testing machine 68
D.2.2 Shearing tool 68
D.3 Test pieces for glulam and glued solid timber 69
D.3.1 Preparation of test pieces 69
D.3.2 Sampling of test pieces (test bars) 70
D.3.3 Marking of test pieces (test bars) 71
D.4 Test pieces for glue lines between glulam components of block glued glulam 72
D.5 Procedure 72
D.6 Results 73
D.7 Report 73

Annex E (normative) Tests with laminations with or without finger joints (including compliance criteria) 74

E.1 Sampling of finger joints in laminations 74
E.1.1 General 74
E.1.2 For Initial type testing 74
E.1.3 For Factory production control 74
E.2 Testing of finger joints in laminations 74
E.2.1 General 74
E.2.2 Additionally for initial type testing 74
E.2.3 Additionally for factory production control 74
E.3 Compliance criteria of finger joints in laminations 75
E.3.1 For Initial type testing 75
E.3.2 For factory production control 75
E.4 Report of tests with finger joints in laminations 75
E.5 Tests with laminations without finger joints 76

Annex F (normative) Bending tests with glued laminated timber, glued solid timber and glulam with large finger joints (including compliance criteria) 77

F.1 Sampling 77
F.2 Testing 77
F.3 Evaluation 77
F.4 Compliance criteria 77
F.5 Report 78

Annex G (normative) Measurement of moisture content 79

G.1 General 79
G.2 Measurement of moisture content of boards during production 79
G.3 Mean moisture content of glued laminated timber and glulam components for the production of glulam with large finger joints and block glued glulam 79
G.4 Moisture content of glued solid timber 79

Annex H (normative) Equipment 80

H.1 General 80
H.2 Additionally for the production of glued laminated timber and glued solid timber 80
H.3 Additionally for the production of glulam with large finger joints 80
H.4 Additionally for the production of block glued glulam 80

Annex I (normative) Minimum production requirements 81

I.1 Personnel 81
I.2 Production and storage facilities 81
I.2.1 General 81
I.2.2 Facilities for drying and storage of timber 81
I.2.3 Facilities for processing and storage of adhesives 81

I.2.4 Facilities for production and curing ... 81
I.3 Equipment ... 81
I.4 Finger joints in laminations ... 82
I.4.1 Wane and edge damages ... 82
I.4.2 Finger joint geometry ... 82
I.4.3 Knots and local grain deviation ... 82
I.4.4 Moisture content at bonding ... 83
I.4.5 Bonding surface and application of the adhesive ... 83
I.4.6 Time between cutting and bonding ... 84
I.4.7 Pressure ... 84
I.4.8 Curing ... 84
I.5 Bonding of laminations ... 85
I.5.1 Permissible finished lamination sizes and radius of curvature ... 85
I.5.2 Laminations made of two boards side by side ... 85
I.5.3 Grooves in laminations ... 85
I.5.4 Orientation of laminations in the cross section ... 86
I.5.5 Moisture content at bonding ... 86
I.5.6 Planing of laminations ... 86
I.5.7 Bonding surface and adhesive application ... 87
I.5.8 Glue line thickness ... 87
I.5.9 Cramping ... 87
I.5.10 Curing ... 87
I.6 Glulam with large finger joints ... 88
I.6.1 Moisture content at bonding ... 88
I.6.2 Finger joint geometry ... 88
I.6.3 Machining of the fingers ... 88
I.6.4 Bonding surface and adhesive application ... 88
I.6.5 Cramping ... 88
I.6.6 Glue line thickness ... 89
I.6.7 Curing ... 89
I.7 Block glued glulam ... 89
I.7.1 Moisture content at bonding ... 89
I.7.2 Bonding surface and adhesive application ... 89
I.7.3 Cramping ... 89
I.7.4 Glue line thickness ... 89
I.7.5 Curing ... 89

Annex ZA (informative) Clauses of this European Standard addressing the provisions of the EU Construction Products Directive ... 90

ZA.1 Scope and relevant characteristics ... 90

ZA.2 Procedures for the attestation of conformity of glued laminated products ... 92

ZA.2.1 System of attestation of conformity ... 92

ZA.2.2 EC certificate of conformity ... 93

ZA.3 CE marking and labelling ... 94

ZA.3.1 General ... 94

ZA.3.2 CE marking on the product ... 94

ZA.3.3 CE marking in the accompanying documents ... 97

Bibliography ... 103
