page ForewordtoEN13286-2:2010 3

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle 6

5 Apparatus 6

6 Preparation 10
6.1 General 10
6.2 Samples for compaction tests 11
6.3 Preliminary assessment 11
6.4 Mixtures totally passing the 16 mm test sieve 11
6.5 Mixtures not totally passing the 16 mm test sieve 11
6.5.1 Mixtures totally passing the 31,5 mm test sieve 11
6.5.2 Mixtures 75 % to 100 % passing the 31,5 mm test sieve and totally passing the 63 mm test sieve 12
6.5.3 Mixtures with an oversize > 25 % by mass on the 31,5 mm test sieve and 75 % to 100 % passing the 63 mm test sieve 12

7 Procedure 12
7.1 Proctor test for mixtures compacted with a 2,5 kg rammer (A) in the Proctor mould (A) 12
7.2 Proctor test for mixtures compacted with a 2,5 kg rammer (A) in the large Proctor mould (B) 13
7.3 Proctor test for mixtures compacted with a 15,0 kg rammer (C) in the extra large Proctor mould (C) 14
7.4 Modified Proctor test for mixtures compacted with a 4,5 kg rammer (B) in the Proctor mould (A) 14
7.5 Modified Proctor test for mixtures compacted with a 4,5 kg rammer (B) in the large Proctor mould (B) 15
7.6 Modified Proctor test for mixtures compacted with a 15,0 kg rammer (C) in the extra large Proctor mould (C) 16

8 Calculations, plotting and expression of results 17
8.1 Calculations 17
8.2 Plotting 17

9 Test report 18

Annex A (informative) Dimensions of alternative apparatus 19

Annex B (normative) One point Proctor test 22

Annex C (informative) Correction for oversize (material retained on the 16 mm, 31,5 mm and 63 mm test sieves) 26

Annex D (informative) Proctor test for self-draining mixtures 27
