Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Classification and designation 8
4.1 General 8
4.2 Temperature classes 8
4.3 Condensate resistance classes 9
4.4 Corrosion resistance classes 9
4.5 Construction classes 10
4.6 Location 10
4.7 Designation 10

5 Requirements 11
5.1 General 11
5.2 Characterisation 11
5.3 Long-term resistance to thermal load 11
5.4 Long-term resistance to condensate exposure 12
5.5 Cyclic condensate resistance test 12
5.6 Relaxation behaviour 12
5.7 Compression set 12
5.8 Tensile strength 13
5.9 Elongation at break 13
5.10 Joints in elastomeric seals 13
5.11 Additional requirements for seals intended to be used for external installation 13

6 Test methods 13
6.1 General 13
6.2 Characterisation 13
6.3 Long-term resistance to thermal load 14
6.4 Long-term resistance to condensate exposure 14
6.5 Cyclic condensate resistance test 15
6.6 Relaxation behaviour 16
6.7 Compression set 16
6.8 Tensile strength 16
6.9 Elongation at break 16
6.10 Strength of joints in elastomeric seals 16
6.11 Additional requirements for seals intended to be used for external installation 16

7 Marking and labelling 17

8 Evaluation of conformity 17
8.1 General 17
8.2 Initial type testing 17
8.3 Further type testing 17

8.4 Factory production control 18

Annex A (normative) Process parameters 20

Annex B (normative) Description of test specimen 21

Annex C (informative) Monitoring by a third party 22
