

DIN EN 14241-1:2013-11 (E)

Chimneys - Elastomeric seals and elastomeric sealants - Material requirements and test methods - Part 1: Seals in flue liners

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	7
4	Classification and designation	8
4.1	General	8
4.2	Temperature classes	8
4.3	Condensate resistance classes	9
4.4	Corrosion resistance classes	9
4.5	Construction classes	10
4.6	Location	10
4.7	Designation	10
5	Requirements	11
5.1	General	11
5.2	Characterisation	11
5.3	Long-term resistance to thermal load	11
5.4	Long-term resistance to condensate exposure	12
5.5	Cyclic condensate resistance test	12
5.6	Relaxation behaviour	12
5.7	Compression set	12
5.8	Tensile strength	13
5.9	Elongation at break	13
5.10	Joints in elastomeric seals	13
5.11	Additional requirements for seals intended to be used for external installation	13
6	Test methods	13
6.1	General	13
6.2	Characterisation	13
6.3	Long-term resistance to thermal load	14
6.4	Long-term resistance to condensate exposure	14
6.5	Cyclic condensate resistance test	15
6.6	Relaxation behaviour	16
6.7	Compression set	16
6.8	Tensile strength	16
6.9	Elongation at break	16
6.10	Strength of joints in elastomeric seals	16
6.11	Additional requirements for seals intended to be used for external installation	16
7	Marking and labelling	17
8	Evaluation of conformity	17
8.1	General	17
8.2	Initial type testing	17
8.3	Further type testing	17

8.4	Factory production control	18
	Annex A (normative) Process parameters	20
	Annex B (normative) Description of test specimen	21
	Annex C (informative) Monitoring by a third party	22
