DIN CEN/TR 16443:2013-05 (E)

Backgrounds to the revision of EN 450-1:2005+A1:2007 - Fly ash for concrete; English version CEN/TR 16443:2013

Contents

Page

Foreword ... 3

Introduction ... 4

1 Scope ... 5

2 List of relevant references ... 5

3 General ... 5
3.1 General and objective ... 5
3.2 Structure of the report ... 6

4 Overview of requirements in EN 450-1:2005+A1:2007 and EN 450-1:2012 ... 6

5 Background for modification of the requirements in EN 450-1 ... 7
5.1 Definition of fly ash ... 7
5.2 Co-combustion materials ... 8
5.3 Loss on ignition ... 11
5.4 Free calcium oxide ... 13
5.5 Reactive silicon dioxide ... 14
5.6 Phosphate ... 15

6 Background for the statistical evaluation for assessment procedure by variables ... 16

7 Background for modification of test methods in EN 450-1 ... 18
7.1 Chemical composition ... 18
7.2 Fineness wet/dry ... 18

8 Measures within EN 450-1 to assure fly ash quality ... 20
8.1 Production process ... 20
8.2 Quality control and conformity evaluation technical properties ... 21
8.3 Conformity evaluation toxicological and environmental aspects ... 21

9 Impact of co-combustion on the release of regulated dangerous substances ... 22
9.1 General ... 22
9.2 Overruling regulation regarding toxicological and environmental aspects ... 22
9.3 Environmental regulations (Leaching) ... 23

Annex A (informative) **List of abbreviations** ... 25

Annex B (informative) **Generation of fly ash** ... 26
B.1 The chain from fuel to fly ash, ready for use in concrete ... 26
B.2 Ash formation during combustion ... 27

Annex C (informative) **Overview of tested fly ashes obtained from co-combustion** ... 31

Annex D (informative) **Calculated maximum co-combustion amounts** ... 33
D.1 Objective ... 33
D.2 Method ... 33
D.3 Data ... 33
D.4 Results ... 33

Bibliography ... 36
