ISO 13033:2013-08 (E)

Bases for design of structures - Loads, forces and other actions - Seismic actions on nonstructural components for building applications

Contents

Page

Foreword v

Introduction vi

1 Scope 1
1.1 General 1
1.2 Relationship with ISO 3010 1
1.3 Components requiring evaluation 1
1.4 Components excluded 2

2 Normative references 2

3 Termsanddefinitions 2

4 Symbols and abbreviated terms 3

5 Seismic design objectives and performance criteria 4

6 Sources of seismic demand on NSCS 5
6.1 General 5
6.2 Inertial demand 5
6.3 Relative displacement demand 5
6.4 Impact demand 6

7 General conditions for determining seismic demand on NSCS 6
7.1 General 6
7.2 Determining seismic demand assuming NSCS does not influence building response 6
7.3 Determining seismic demands assuming NSCS influences building response 7

8 QuantificationofelasticseismicdemandonNSCS 7
8.1 General 7
8.2 Inertial force demands determined by dynamic analysis 7
8.3 Inertial elastic force demands determined by equivalent static analysis 8
8.4 Seismic relative displacement demands 10
8.5 Impact demand 11

9 VerificationofNSCS 11
9.1 Performance acceptance criteria 11
9.2 Verification by design analysis 12
9.3 Verification by seismic qualification testing 13
9.4 Verification by documented performance in past earthquakes (experience data) 15
9.5 Verification by a combination of procedures 15

10 VerificationofseismicloadpathbetweenNSCSandbuildingstructuralsystem 15

11 Quality assurance and enforcement 16

Annex A (informative)IdentificationofNSCSrequiringseismicevaluation 17

Annex B (informative) Principles for choosing importance factors for NSCS 20

Annex C (informative)Principlesforchoosingthefloorresponseamplificationfactor (height factor) 22

Annex D (informative)Principlesforchoosingthecomponentamplificationfactor (resonance factor) .. 24

Annex E (informative)Principlesfordeterminingresponsemodificationfactors 26

Annex F (informative) Principles for determining seismic relative displacements for drift- sensitive components 27

Annex G (informative) Floor response spectra 29

Annex H (informative) Methods for verifying NSCS by design analysis 32

Annex I (informative)NSCSverificationbyshaketabletesting 35

Annex J (informative)NSCSverificationthroughuseofexperiencedata 37

Annex K (informative) Principles of seismic anchorage of NSCS 38

Annex L (informative) Quality assurance in design and construction 42

Bibliography 43
