Foreword to EN 1997-1:2004 ..... **5**

Foreword to EN 1997-1:2004/A1:2013 ..... **5**

Section 1 General **9**
1.1 Scope 9
1.2 Normative references 10
1.3 Assumptions 11
1.4 Distinction between Principles and Application Rules 11
1.5 Definitions 12
1.6 Symbols 13

Section 2 Basis of geotechnical design **20**
2.1 Design requirements 20
2.2 Design situations 22
2.3 Durability 23
2.4 Geotechnical design by calculation 24
2.5 Design by prescriptive measures 36
2.6 Load tests and tests on experimental models 37
2.7 Observational method 37
2.8 Geotechnical Design Report 37

Section 3 Geotechnical data **39**
3.1 General 39
3.2 Geotechnical investigations 39
3.3 Evaluation of geotechnical parameters 40
3.4 Ground Investigation Report 48

Section 4 Supervision of construction, monitoring and maintenance **50**
4.1 General 50
4.2 Supervision 50
4.3 Checking ground conditions 52
4.4 Checking construction 53
4.5 Monitoring 54
4.6 Maintenance 55

Section 5 Fill, dewatering, ground improvement and reinforcement **56**
5.1 General 56
5.2 Fundamental requirements 56
5.3 Fill construction 56
5.4 Dewatering 60
5.5 Ground improvement and reinforcement 61

Section 6 Spread foundations **62**
6.1 General 62
6.2 Limit states 62
6.3 Actions and design situations 62
6.4 Design and construction considerations 62
6.5 Ultimate limit state design 63
6.6 Serviceability limit state design 66
6.7 Foundations on rock; additional design considerations 68
6.8 Structural design of spread foundations 69
6.9 Preparation of the subsoil 69

Section 7 Pile foundations **71**
7.1 General 71
7.2 Limit states 71
7.3 Actions and design situations 71
7.4 Design methods and design considerations 73
7.5 Pile load tests 75
7.6 Axially loaded piles 77
7.7 Transversely loaded piles 87
7.8 Structural design of piles 89
7.9 Supervision of construction 89

Section 8 [A1] Anchors [A1] **92**
8.1 General 92
8.2 Limit states 93
8.3 Design situations and actions 94
8.4 Design and construction considerations 94
8.5 Limit state design of anchors 95
8.6 Tests on anchors 98
8.7 Lock-off load for pre-stressed anchors 99
8.8 Supervision, monitoring and maintenance 99

Section 9 Retaining structures **100**
9.1 General 100
9.2 Limit states 100
9.3 Actions, geometrical data and design situations 101
9.4 Design and construction considerations 104
9.5 Determination of earth pressures 105
9.6 Water pressures 108
9.7 Ultimate limit state design 108
9.8 Serviceability limit state design 112

Section 10 Hydraulic failure **114**
10.1 General 114
10.2 Failure by uplift 115
10.3 Failure by heave 117
10.4 Internal erosion 117
10.5 Failure by piping 118

Section 11 Overall stability **120**
11.1 General 120
11.2 Limit states 120
11.3 Actions and design situations 120
11.4 Design and construction considerations 121
11.5 Ultimate limit state design 122
11.6 Serviceability limit state design 124
11.7 Monitoring 124

Section 12 Embankments **126**
12.1 General 126
12.2 Limit states 126
12.3 Actions and design situations 126
12.4 Design and construction considerations 127
12.5 Ultimate limit state design 128
12.6 Serviceability limit state design 129
12.7 Supervision and monitoring 129

Annex A (normative) **[A1] Partial and correlation factors for ultimate and serviceability limit states and recommended values [A1]** **131**

Annex B (informative) **Background information on partial factors for Design Approaches 1, 2 and 3** **143**

Annex C (informative) **Sample procedures to determine earth pressures** **146**

Annex D (informative) **A sample analytical method for bearing resistance calculation** **162**

Annex E (informative) **A sample semi-empirical method for bearing resistance estimation** **165**

Annex F (informative) **Sample methods for settlement evaluation** **166**

Annex G (informative) **A sample method for deriving presumed bearing resistance for spread foundations on rock** **168**

Annex H (informative) **Limiting values of structural deformation and foundation movement** **170**

Annex J (informative) **Checklist for construction supervision and performance monitoring** **172**
