ISO 4355:2013-12 (E)

Bases for design of structures - Determination of snow loads on roofs

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Snow loads on roofs 3
4.1 General function describing intensity and distribution of the snow load on roofs 3
4.2 Approximate formats for the determination of the snow load on roofs 3
4.3 Partial loading due to melting, sliding, snow redistribution, and snow removal 4
4.4 Ponding instability 4

5 Characteristic snow load on the ground 4

6 Snowloadcoefficients 4
6.1 Exposure coefficient 4
6.2 Thermal coefficient 6
6.3 Surface material coefficient 6
6.4 Shape coefficients 6

Annex A (informative) Background on the determination of some snow parameters 8

Annex B (normative) Snow load distribution on selected types of roof 13

Annex C (informative)Determinationoftheexposurecoefficientforsmallroofs 28

Annex D (informative)Determinationofthermalcoefficient 31

Annex E (informative) Roof snow retention devices 34

Annex F (informative) Snow loads on roof with snow control 36

Annex G (informative) Alternative methods to determine snow loads on roofs not covered by the prescriptive methods in this International Standard 38
