

# DIN 4140:2014-04 (E)

## Insulation work on industrial installations and building equipment - Execution of thermal and cold insulations

---

<b>Contents</b>		<b>Page</b>
Foreword .....		5
<b>1</b>	<b>Scope .....</b>	<b>6</b>
<b>2</b>	<b>Normative references .....</b>	<b>6</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>10</b>
<b>4</b>	<b>General requirements .....</b>	<b>17</b>
4.1	Principles .....	17
4.2	Preconditions for construction .....	17
4.3	Preconditions for beginning insulation work .....	17
4.4	Requirements for building materials and components .....	21
4.5	Requirements relating to execution of work .....	22
4.5.1	General .....	22
4.5.2	Prevention of convection .....	22
4.5.3	Protection against ingress of water .....	22
4.5.4	Thermal stress in reinforcing profiles .....	24
4.5.5	Accounting for longitudinal thermal expansion - Expansion joints .....	26
4.5.6	Inclusion of meteorological and traffic loads .....	27
4.5.7	Contact prevention .....	27
4.6	Protection against corrosion .....	27
4.6.1	Corrosion protection under insulation .....	27
4.6.2	Corrosion protection of components of the insulation system .....	28
4.7	Fire protection .....	29
<b>5</b>	<b>Insulation of hot objects .....</b>	<b>30</b>
5.1	Insulation materials and their workmanship .....	30
5.1.1	General .....	30
5.1.2	Insulation with mineral wool (MW) .....	30
5.1.3	Insulation with calcium-magnesium-silicate fibre (CMS) .....	34
5.1.4	Insulation with aluminium-silicate wool (ASW); (old designation: ceramic fibres) .....	34
5.1.5	Insulation with calcium silicate (CS) .....	35
5.1.6	Insulation with alkaline earth-silicate wool (AES); (old designation: silicate wool) .....	35
5.1.7	Insulation with microporous insulants .....	36
5.1.8	Insulation with polyurethane/polyisocyanurate rigid foam (PUR/PIR) .....	38
5.1.9	Insulation with polyurethane in-situ foam (PUR) .....	39
5.1.10	Insulation with expanded polystyrene foam (EPS) .....	39
5.1.11	Insulation with extruded polystyrene foam (XPS) .....	39
5.1.12	Insulation with cellular glass (CG) .....	40
5.1.13	Insulation with flexible elastomeric foam (FEF) .....	41
5.1.14	Insulation with polyethylene foam (PEF) .....	41
5.1.15	Insulation with phenolic foam (PF) .....	42
5.1.16	Insulation with melamine resin foam .....	42
5.1.17	Insulation with expanded perlite (EP) .....	42
5.2	Means of fastening insulation .....	43
5.3	Examples of hot insulation systems .....	43
5.4	Hot insulation systems with sound insulation requirements .....	43
<b>6</b>	<b>Cold insulation .....</b>	<b>44</b>
6.1	Insulation materials and their workmanship .....	44

6.1.1	General .....	44
6.1.2	Cold insulation with mineral wool (MW) and other fibrous or open-cell insulants .....	44
6.1.3	Cold insulation with polyurethane/polyisocyanurate rigid foam (PUR-PIR) .....	44
6.1.4	Cold insulation with polyurethane in-situ foam (PUR) .....	45
6.1.5	Cold insulation with expanded polystyrene foam (EPS) .....	45
6.1.6	Cold insulation with extruded polystyrene foam (XPS) .....	45
6.1.7	Cold insulation with cellular glass (CG) .....	45
6.1.8	Cold insulation with elastomeric foam (FEF) .....	45
6.1.9	Cold insulation with polyethylene foam (PEF) .....	46
6.1.10	Cold insulation with phenolic foam (PF) .....	46
6.1.11	Cold insulation with expanded perlite (EP) .....	46
6.2	Means of fastening cold insulation systems .....	46
6.2.1	General .....	46
6.2.2	Adhesive .....	46
6.2.3	Mechanical fastening .....	47
6.3	Vapour retarders .....	47
6.3.1	Materials for vapour retarders .....	47
6.3.2	Execution .....	47
6.4	Expansion joints .....	48
6.5	Examples of cold insulation systems .....	49
6.6	Cold insulation with sound insulation requirements .....	49
7	Insulation of installations with alternating temperatures .....	49
8	Other components of insulation systems .....	50
8.1	Supporting structures .....	50
8.1.1	General .....	50
8.1.2	Dimensioning and design .....	50
8.2	Spacer-ring constructions .....	50
8.2.1	General .....	50
8.2.2	Dimensioning .....	50
8.2.3	Spacer-ring constructions for hot insulations .....	50
8.2.4	Spacer-ring constructions for cold insulations .....	52
8.3	Claddings .....	54
8.3.1	General .....	54
8.3.2	Claddings made of flat sheets .....	55
8.3.3	Claddings made of profiled sheet metal .....	56
8.3.4	Execution .....	56
8.3.5	Cladding sheets .....	58
8.3.6	Claddings for prefabricated insulated pipe systems .....	60
8.3.7	Mastic .....	60
8.3.8	Bitumen-based claddings .....	60
8.3.9	Cladding of rigid plastic sheeting .....	61
8.3.10	Claddings of embossed aluminium foils .....	61
8.3.11	Other casings .....	62
8.4	Insulation of pipe fittings .....	62
8.4.1	General .....	62
8.4.2	Removable boxes and caps .....	62
8.4.3	Cold insulation for expansion compensators .....	64
8.4.4	Cold insulation on flanges .....	65
8.4.5	Cold insulation at fittings .....	66
8.4.6	Name plates .....	66
8.4.7	Cooling zones/tracer heating systems located on the outside .....	66
8.5	Bolsters .....	67
8.5.1	General .....	67
8.5.2	Materials for bolsters .....	67
8.5.3	Execution of supports in cold insulations .....	67
	Annex A (informative) Design of hot and cold insulation systems .....	70
	Annex B (informative) Reference values for insulation material properties .....	81

<b>Annex C (informative) Means of fastening insulation materials .....</b>	<b>89</b>
<b>Annex D (informative) Examples of cold insulation design .....</b>	<b>91</b>
<b>Bibliography .....</b>	<b>100</b>
<b>Figures Figure 1 - Minimum distances between insulated objects and between insulated objects and other components of vessels, fittings, columns and tanks .....</b>	<b>18</b>
<b>Figure 2 - Minimum distances between insulated pipes and pipes without insulation for pipe sizes up to d = 400 .....</b>	<b>18</b>
<b>Figure 3 - Minimum dimensions and distances of insulated objects; pipes with flanges .....</b>	<b>19</b>
<b>Figure 4 -- Minimum distances X and Y between several insulated ducts, vertical and horizontal ducts and pipes between each other and to adjacent ceilings &amp; walls .....</b>	<b>20</b>
<b>Figure 5 -- Contour-following insulation .....</b>	<b>25</b>
<b>Figure 6 -- Insulation with air gap .....</b>	<b>25</b>
<b>Figure 7 -- Fastening using pins and clips using the example of boiler or duct wall insulation .....</b>	<b>36</b>
<b>Figure 8 - Expansion joint in vertical position (insulation material: cellular glass) .....</b>	<b>48</b>
<b>Figure 9 - Expansion joints in objects in horizontal position .....</b>	<b>49</b>
<b>Figure 10 - Number and location of fasteners for removable boxes .....</b>	<b>63</b>
<b>Figure 11 - Cold insulation for expansion compensator .....</b>	<b>64</b>
<b>Figure 12 - Cold insulation of flanges .....</b>	<b>65</b>
<b>Figure 13 - Cold insulation of pipe fitting .....</b>	<b>66</b>
<b>Figure 14 -- Example: Loose support for horizontal and vertical pipes, pipe insulation of polyurethane (PUR) in-situ foam or polyurethane (PUR) semi-sections (with or without shiplap edges) .....</b>	<b>68</b>
<b>Figure 15 -- Example: Loose supports for horizontal and vertical pipes, bolsters made of section segments, pipe insulation made of polyurethane (PUR) in-situ foam .....</b>	<b>68</b>
<b>Figure 16 -- Pipe supports .....</b>	<b>69</b>
<b>Figure D.1 -- Supports for horizontal vessels .....</b>	<b>91</b>
<b>Figure D.2 -- Supports for horizontal vessels .....</b>	<b>92</b>
<b>Figure D.3 -- Loose support with sliding board - Detail of Figure D.2 .....</b>	<b>92</b>
<b>Figure D.4 --Fixed points without sliding board - Detail of Figure D.2 .....</b>	<b>92</b>
<b>Figure D.5 -- Support for vertical vessels with outriggers .....</b>	<b>93</b>
<b>Figure D.6 -- Support for vertical vessels .....</b>	<b>93</b>
<b>Figure D.7 -- Anchoring at the fixed point - Detail of Figure D.4 .....</b>	<b>93</b>
<b>Figure D.8 -- Detail of Figures D.5 and D.6 .....</b>	<b>93</b>
<b>Figure D.9 -- Horizontal section through column with penetrations .....</b>	<b>94</b>

<b>Figure D.10 -- Supports for vessels with even base (with surface completely resting on insulation material) .....</b>	<b>95</b>
<b>Figure D.11 -- Supports for vessels with even base (ring support) .....</b>	<b>96</b>
<b>Figure D.12 -- Supports for double-wall tank .....</b>	<b>97</b>
<b>Figure D.13 -- Supports for double-wall tank (outer tank closed) .....</b>	<b>98</b>
<b>Figure D.14 -- Support for spherical tank .....</b>	<b>99</b>
