

# ISO/TR 12930:2014-04 (E)

## Seismic design examples based on ISO 23469

---

<b>Contents</b>		<b>Page</b>
Foreword .....		vi
Introduction .....		vii
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Purpose and policy of collecting design examples .....</b>	<b>1</b>
2.1	Purpose of collecting well-chosen examples .....	1
2.2	Concept and policy of choosing and composing .....	2
2.3	Development and result .....	2
2.4	General conclusion of TR12930 obtained through its development .....	2
2.5	Editors, authors and reviewers .....	3
2.5.1	Editors .....	3
2.5.2	Authors .....	3
2.5.3	Reviewers .....	4
<b>3</b>	<b>Assessment for conformity with ISO 23469 .....</b>	<b>4</b>
<b>4</b>	<b>First stage of specifying seismic actions - Determination of site-specific earthquake ground motions demonstrated by design examples .....</b>	<b>4</b>
4.1	General .....	5
4.1.1	Methodology for empirical method in deterministic approach and examples .....	5
4.1.2	Examples .....	6
4.2	Site-specific seismic hazard analysis evaluation .....	7
4.2.1	Probabilistic approach- Probabilistic seismic hazard analysis with focus on Fourier amplitude and group delay time .....	8
4.2.1.1	Outline .....	8
4.2.1.2	Evaluation of Site Amplification Factor .....	9
4.2.1.3	Earthquake scenarios and probability of occurrence .....	10
4.2.1.4	Evaluation of Fourier amplitude spectra .....	11
4.2.1.5	Evaluation of uniform hazard Fourier spectrum .....	12
4.2.1.6	Evaluation of ground motion time history .....	13
4.2.1.7	Example of application .....	13
4.2.2	Site-specific approach on earthquake motions probabilistically evaluated in a LNG tank design considering a specific active fault .....	18
4.2.2.1	General procedure and design example .....	18
4.2.3	Deterministic approach - Theoretical ground motion estimation based on hypothetical scenario earthquakes .....	21
4.2.3.1	Methodology for theoretical ground motion estimation .....	21
4.2.3.2	Recipe for strong ground motion estimation .....	23
4.2.3.3	Sedimentary structure model .....	26
4.2.3.4	Examples of strong ground motion estimation .....	28
4.2.4	Deterministic approach - Ground motion estimation based on semi empirical approach ..	29
4.2.4.1	Outline .....	29
4.2.4.2	Evaluation of site amplification factor .....	31
4.2.4.3	Evaluation of strong ground motion .....	34
4.2.4.4	Example of application .....	39
4.3	Determination of earthquake ground motion to be used in site response analysis .....	43
4.3.1	Empirical and site simplified analysis approach .....	43
4.3.1.1	Simplified procedure of Seismic Deformation Method .....	43
4.3.1.2	Natural period of an example ground .....	45
4.3.1.3	Ground displacement .....	46

<b>5</b>	<b>Second stage of specifying seismic actions. Seismic evaluation of geotechnical works demonstrated by design examples .....</b>	<b>47</b>
<b>5.1</b>	<b>Demonstrations of seismic evaluation using simplified and detailed analyses .....</b>	<b>47</b>
<b>5.1.1</b>	<b>Simplified static and detailed dynamic analyses in design example of gravity quay wall in port .....</b>	<b>47</b>
<b>5.1.1.1</b>	<b>Purpose and functions .....</b>	<b>47</b>
<b>5.1.1.2</b>	<b>Performance objectives for seismic design .....</b>	<b>47</b>
<b>5.1.1.3</b>	<b>Reference earthquake motions .....</b>	<b>48</b>
<b>5.1.1.4</b>	<b>Performance criteria and limit states .....</b>	<b>48</b>
<b>5.1.1.5</b>	<b>Specific issues related to geotechnical works .....</b>	<b>50</b>
<b>5.1.1.6</b>	<b>Procedure for determining seismic actions .....</b>	<b>50</b>
<b>5.1.1.7</b>	<b>Ground failure and other geotechnical hazards .....</b>	<b>52</b>
<b>5.1.1.8</b>	<b>Spatial variation .....</b>	<b>55</b>
<b>5.1.1.9</b>	<b>Types and models of analysis .....</b>	<b>55</b>
<b>5.1.1.10</b>	<b>Simplified equivalent static analysis .....</b>	<b>57</b>
<b>5.1.1.11</b>	<b>Detailed equivalent static analysis .....</b>	<b>61</b>
<b>5.1.1.12</b>	<b>Simplified dynamic analysis .....</b>	<b>61</b>
<b>5.1.1.13</b>	<b>Detailed dynamic analysis .....</b>	<b>61</b>
<b>5.1.2</b>	<b>Highway bridge pile foundation .....</b>	<b>64</b>
<b>5.1.2.1</b>	<b>Outline of the highway bridge .....</b>	<b>64</b>
<b>5.1.2.2</b>	<b>Seismic performance requirements .....</b>	<b>66</b>
<b>5.1.2.3</b>	<b>Input ground motions used in seismic design and analysis model of the entire bridge .....</b>	<b>68</b>
<b>5.1.2.4</b>	<b>Seismic design of foundations .....</b>	<b>71</b>
<b>5.1.3</b>	<b>Assessment of seismic performance of the Sutong Bridge, a long cable-stayed bridge (Pile foundation) .....</b>	<b>79</b>
<b>5.1.3.1</b>	<b>Bridge outline .....</b>	<b>79</b>
<b>5.1.3.2</b>	<b>Design seismic ground motion and seismic performance .....</b>	<b>80</b>
<b>5.1.3.3</b>	<b>Seismic performance of foundations .....</b>	<b>82</b>
<b>5.1.4</b>	<b>Earth fill dam .....</b>	<b>86</b>
<b>5.1.4.1</b>	<b>Purpose and functions .....</b>	<b>86</b>
<b>5.1.4.2</b>	<b>Performance objectives for seismic design .....</b>	<b>87</b>
<b>5.1.4.3</b>	<b>Procedure for determining seismic actions .....</b>	<b>88</b>
<b>5.1.4.4</b>	<b>Soil properties and models for detailed dynamic analysis .....</b>	<b>90</b>
<b>5.1.4.5</b>	<b>Simplified equivalent static analysis: Slip analysis results; .....</b>	<b>93</b>
<b>5.1.4.1</b>	<b>Detailed dynamic analysis: Results of FEM dynamic analysis; .....</b>	<b>94</b>
<b>5.1.5</b>	<b>Gravity sea wall as coastal structure .....</b>	<b>97</b>
<b>5.1.5.1</b>	<b>Purpose and functions .....</b>	<b>97</b>
<b>5.1.5.2</b>	<b>Performance objectives for seismic design .....</b>	<b>97</b>
<b>5.1.5.3</b>	<b>Reference earthquake motions .....</b>	<b>98</b>
<b>5.1.5.4</b>	<b>Performance criteria and limit states .....</b>	<b>98</b>
<b>5.1.5.5</b>	<b>Specific issues related to geotechnical works .....</b>	<b>100</b>
<b>5.1.5.6</b>	<b>Procedure for determining seismic actions .....</b>	<b>100</b>
<b>5.1.5.7</b>	<b>Earthquake ground motions .....</b>	<b>100</b>
<b>5.1.5.8</b>	<b>Seismic coefficient determinations .....</b>	<b>102</b>
<b>5.1.5.9</b>	<b>Effects of soil liquefaction .....</b>	<b>105</b>
<b>5.1.5.10</b>	<b>Spatial variation .....</b>	<b>107</b>
<b>5.1.5.11</b>	<b>Procedure for specifying seismic actions .....</b>	<b>107</b>
<b>5.2</b>	<b>Demonstrations evaluating and designing for ground displacement effects .....</b>	<b>111</b>
<b>5.2.1</b>	<b>Pile foundations of railway bridges .....</b>	<b>111</b>
<b>5.2.1.1</b>	<b>Outline of railway bridge pier .....</b>	<b>111</b>
<b>5.2.1.2</b>	<b>Seismic performance requirements .....</b>	<b>112</b>
<b>5.2.1.3</b>	<b>Reference earthquake ground motions .....</b>	<b>115</b>
<b>5.2.1.4</b>	<b>Site response analysis and assessment of liquefaction potential .....</b>	<b>117</b>
<b>5.2.1.5</b>	<b>Procedure for specifying seismic actions on piles .....</b>	<b>119</b>
<b>5.2.1.6</b>	<b>Simplified equivalent static analysis - Seismic Deformation Method .....</b>	<b>120</b>
<b>5.2.2</b>	<b>Design and actual performance of pile foundation of high R/C smokestack on soft ground .....</b>	<b>125</b>
<b>5.2.2.1</b>	<b>General remarks .....</b>	<b>125</b>
<b>5.2.2.2</b>	<b>Purpose and functions .....</b>	<b>126</b>
<b>5.2.2.3</b>	<b>Performance objectives for seismic design and reference earthquake motions .....</b>	<b>126</b>
<b>5.2.2.4</b>	<b>Performance criteria and limit states .....</b>	<b>127</b>

5.2.2.5	Policy of determining seismic actions on superstructure and foundation for design .....	129
5.2.2.6	Features of smokestack and geotechnical characterization .....	131
5.2.2.7	Models of simplified and detailed dynamic analyses for specifying seismic actions .....	135
5.2.2.8	Results of detailed dynamic analyses .....	138
5.2.2.9	Verification of models based on vibration tests .....	139
5.2.2.10	Actual seismic behaviour of ground and smokestack .....	142
5.2.2.11	Verification of models based on strong motion records .....	145
5.2.3	Shallow immersed rectangular tunnel in soft soils .....	150
5.2.3.1	Thessaloniki immersed roadway tunnel .....	150
5.2.3.2	Behaviour of longitudinal underground structures under seismic loading .....	151
5.2.3.3	Analysis methods .....	152
5.2.3.4	Determination of input motion .....	153
5.2.3.5	Simplified equivalent static analysis .....	154
5.2.3.6	Detailed equivalent static analysis .....	156
5.2.3.7	Detailed full dynamic analysis .....	158
5.2.3.8	Results and discussion .....	159
5.3	Demonstrations evaluating and designing for liquefaction effects .....	161
5.3.1	Evaluation of 3D SSI effects of pile foundation of LNG tank model by detailed dynamic analyses .....	161
5.3.1.1	Problem description .....	161
5.3.1.2	Results of analyses and discussion .....	162
5.3.1.3	Consideration of results into design .....	166
5.3.2	Evaluation of 3-D effects of lattice-arranged numerous piles by detailed dynamic analyses .....	166
5.3.2.1	Objectives .....	166
5.3.2.2	Results of analyses and discussion .....	166
5.3.3	Evaluation of pile-volume effects of a huge number of piles by detailed dynamic analyses .....	169
5.3.3.1	Introduction .....	169
5.3.3.2	Results of analyses and discussion .....	169
5.3.3.3	Consideration of results into design .....	170
5.4	Demonstrations evaluating and designing for fault displacement effects .....	171
5.4.1	Seismic design abstract of road embankment taking account of surface fault rupture ....	171
5.4.1.1	Purpose and functions .....	171
5.4.1.2	Performance objectives and ground motions for seismic design .....	172
5.4.1.3	Performance criteria .....	172
5.4.1.4	Procedure for determining seismic actions .....	172
5.4.1.5	Ground failure and other geotechnical hazards .....	173
5.4.1.6	Types of analysis .....	174
5.4.1.7	Simple static analysis .....	174
5.4.1.8	Detailed dynamic analysis .....	174
5.4.2	Shield tunnel subject to fault displacements (Detailed analysis) .....	176
5.4.2.1	General remarks .....	176
5.4.2.2	Soil conditions and shield tunnel .....	176
5.4.2.3	Estimation of fault displacement at base layer .....	176
5.4.2.4	Method of analysis and modelling nonlinear behaviour of soil .....	178
5.4.2.5	Results of analyses .....	180
5.4.2.6	Influence of fault displacement to tunnel .....	183
5.4.3	Design considerations for a water pipeline access tunnel subject to earthquake hazards	184
5.4.3.1	Purpose and functions .....	184
5.4.3.2	Project description .....	184
5.4.3.3	Performance objectives and reference earthquake design levels .....	186
5.4.3.4	Performance criteria .....	187
5.4.3.5	Specific issues related to geotechnical works .....	187
5.4.3.6	Evaluation of earthquake ground motions and fault displacements .....	188
5.4.3.7	Simplified equivalent static analysis .....	192
Annex A (informative) Conformity with provisional sentences in ISO 23469 .....		201
A.1	General .....	201
