

DIN EN 16012:2015-05 (E)

Thermal insulation for buildings - Reflective insulation products - Determination of the declared thermal performance (includes Amendment A1:2015)

Contents	Page
Foreword	4
Introduction	5
1 Scope	6
2 Normative references	6
3 Terms, definitions, symbols and units	7
3.1 Terms and definitions	7
3.2 Symbols and units	7
4 Description of product types	8
4.1 Product classification	8
4.2 Product Type 1	8
4.3 Product Type 2	9
4.4 Product Type 3	9
4.5 Product Type 4	10
5 Methods of assessment	11
5.1 General	11
5.2 Thickness measurement	11
5.3 "Test specimens"	11
5.4 Determination of thermal resistance - outline	11
5.5 Determination of core thermal resistance of Product Type 1	12
5.6 Determination of core thermal resistance of Product Type 2	13
5.7 Determination of core thermal resistance of Product Type 3 (METHOD C)	13
5.8 Determination of the thermal performance of Product Type 4	18
5.9 Emissivity	19
6 Uncertainty	20
6.1 General	20
6.2 Thickness measurements	20
6.3 Use of surface thermocouples on thin samples in a guarded hot plate or in heat flow meter measurement	20
6.4 Use of dummy insulation specimens	20
6.5 Derivation of the core resistance of a Type 3 Product from hot box measurements	20
7 Expression of results	21
7.1 Results derived from hot plate and emissivity measurements (Products Type 1 & 2)	21
7.2 Results derived from hot box and emissivity measurements (Product Types 1, 2 & 3)	21
7.3 Results derived from emissivity measurements only (product Type 4)	21
8 Report	22
Annex A (normative)	23
Annex B (normative)	24
Annex C (normative)	25

Annex D (normative) Measurement of emissivity using a Thermal Infra-Red apparatus	26
D.1 Principle of the hemispherical blackbody radiator	26
D.2 Description of suitable hemispherical blackbody radiator and specimen holder	26
D.3 Calibration standards	27
D.4 Calculation of the emissivity	28
D.5 Sampling and preparation of the test specimens	28
D.5.1 Sampling	28
D.5.2 Dimensions and numbers of specimens	28
D.5.3 Conditioning of specimens for ageing	28
D.6 Procedure for measurement of specimens	28
D.7 Expression of results	29
Annex E (normative) "Dummy specimen" technique for the heat flow meter apparatus	30
E.1 Principle	30
E.2 Procedure	30
E.3 Specimens of low thermal resistance	31
E.4 Calibration	31
Bibliography	32
