DIN EN 16681:2016-12 (E)

Steel static storage systems - Adjustable pallet racking systems - Principles for seismic design

Contents

Page

European foreword 5

0 Introduction 5

1 Scope 8

2 Normative references 8

3 Terms and definitions 9

4 Symbols and abbreviations 10
4.1 Symbols 10
4.2 Abbreviations 12

5 Performance requirements and compliance criteria 13
5.1 Applicability 13
5.2 Performance requirements 13
5.2.1 No collapse requirement 13
5.2.2 Damage limitation requirement 13
5.2.3 Movement of unit loads 13

6 Ground conditions and seismic action 14
6.1 General 14
6.2 Damping 14
6.3 Importance factor I 14
6.4 Horizontal component of the seismic action 15
6.5 Vertical component of the seismic action 15
6.6 Design ground displacement 15
6.7 Racks supported by suspended floors 16

7 Methods of analysis 16
7.1 General 16
7.2 Limitation of the vertical load referred to the critical Euler Load 16
7.3 Inter-storey drift sensitivity coefficient 16
7.4 Analysis procedures 17
7.4.1 General 17
7.4.2 Second order effects 17
7.4.3 Lateral Force Method of Analysis (LFMA) 18
7.4.4 Modal Response Spectrum Analysis (MRSA) 20
7.4.5 Large Displacement Method of Analysis (LDMA) 20
7.4.6 Combination of the effects of the components of the seismic action 20
7.4.7 Displacements calculation 21
7.5 Design parameters for seismic analysis 21
7.5.1 General 21
7.5.2 Design spectrum modification factors 21
7.5.3 Unit load-beam friction coefficients 22
7.5.4 Design seismic weight of the unit load 23
7.5.5 Unit load weight modification factor 23
7.5.6 Other seismic weights 24
7.5.7 Weight of the seismic masses 24
7.5.8 Position of the centre of gravity of the unit load 24

7.5.9 Positioning tolerances ... 26
7.5.10 Structural regularity criteria ... 26
7.6 Modelling assumptions for structural analysis ... 27
7.6.1 Sub-modelling ... 27
7.6.2 Distribution of the masses ... 27
7.6.3 Specific modelling requirements for the analysis ... 28
7.6.4 Moment redistribution near the upright's base due to the floor reaction ... 29

8 Specific rules ... 31
8.1 Design concepts ... 31
8.1.1 General ... 31
8.1.2 Materials ... 31
8.1.3 Structural systems ... 32
8.1.4 Regularity criteria ... 32
8.1.5 Unbraced racks ... 38
8.1.6 Rules for the design of low dissipative structures ... 39
8.1.7 Rules for the design of dissipative structures ... 39
8.1.8 Anchoring conditions ... 39
8.2 Structural systems withstanding the seismic action ... 40
8.3 Structural types and behaviour factor ... 41
8.3.1 Upright frames ... 41
8.3.2 Moment resisting frames ... 42
8.3.3 Racks with vertical bracings in down aisle direction ... 44

9 Seismic analysis and design ... 47
9.1 Actions ... 47
9.1.1 Actions to be considered simultaneously with earthquake ... 47
9.1.2 Actions not to be considered simultaneously with earthquake ... 47
9.2 Safety Verifications ... 48
9.2.1 Ultimate limit states ... 48
9.2.2 Movements of the unit loads ... 49
9.3 Pallet beam design ... 50
9.3.1 Actions on pallet beams ... 50
9.3.2 Buckling length in the horizontal plane ... 51
9.3.3 Correction coefficient for horizontal bending ... 52
9.3.4 Buckling length factor in the vertical plane ... 52
9.3.5 Beam design check ... 52

Annex A (informative) Analysis methods including second order effects ... 54

Annex B (normative) Evaluation of the unit load -- beam friction coefficient ... 61

Annex C (informative) Principles for modelling the unit load masses ... 66

Annex D (informative) Simplified method to evaluate the influence of the centre of gravity of the pallet regarding the beam level ... 69

Annex E (informative) Principles for the design of racks supported by floors ... 70

Annex F (normative) Additional detailing rules for dissipative elements (Concept B) ... 72

Annex G (normative) Testing procedure for beam-upright and floor connections for dissipative design (concept B) ... 73

Annex H (informative) Assessment of the stability of the unit load ... 76

Annex I (informative) Data to be exchanged between the Specifier/End User and the Rack's Supplier ... 78

Annex J (normative) Complementary rules to EN 15635 ... 79

Annex K (informative) Complementary rules to EN 15629 -- Warehouse environmental condition category **80**

Annex L (informative) A-deviations **81**

Bibliography **83**
