DIN EN ISO 52000-1:2018-03 (E)

Energy performance of buildings - Overarching EPB assessment - Part 1: General framework and procedures (ISO 52000-1:2017)

Contents

Page

European foreword ... **5**

Foreword ... **6**

Introduction ... **7**

1 Scope ... **11**

2 Normative references ... **11**

3 Terms and definitions ... **11**
3.1 Building ... 12
3.2 Indoor and outdoor conditions ... 14
3.3 Technical building systems ... 15
3.4 Energy ... 17
3.5 Energy performance ... 20
3.6 Energy calculation ... 23

4 Symbols, subscripts and abbreviations ... **24**
4.1 Symbols ... 25
4.2 Subscripts ... 26
4.3 Abbreviations ... 27

5 Description of the overarching framework and procedures ... **28**
5.1 Output of the method ... 28
5.2 General description of the procedures and routing ... 28
5.3 Selection criteria between the methods ... 30

6 Overarching preparation steps ... **30**
6.1 General ... 30
6.2 List of types and categories ... 30
6.2.1 Type of object ... 30
6.2.2 Building category and space categories ... 31
6.2.3 Type of application ... 31
6.2.4 Types of assessment ... 31
6.2.5 Building services ... 32
6.3 Identification of types and categories for a specific case ... 32
6.3.1 General ... 32
6.3.2 Output data ... 33

7 Calculated energy performance of buildings ... **33**
7.1 Output data ... 33
7.2 Calculation intervals and calculation period ... 34
7.2.1 Calculation interval ... 34
7.2.2 Calculation period ... 34
7.3 Input data ... 35
7.3.1 Product data ... 35
7.3.2 System design data ... 35
7.3.3 Operating conditions data ... 35
7.3.4 Constants and physical data ... 38
7.3.5 Other data ... 38
7.4 Description of the calculation procedure ... 38

8 Measured overall energy performance and comparison with calculations ... **39**
8.1 General ... 39
8.2 Output of the method ... 39

8.3 Measurement intervals and measurement period 39
8.4 Input data 40
8.4.1 Product data 40
8.4.2 System design data 40
8.4.3 Operating conditions data 40
8.4.4 Constants and physical data 41
8.4.5 Other data 41
8.5 Measurement procedures 41
8.6 Calculation of the energy performance based on measured energy 41
8.7 Comparison between calculated energy performance and measured energy performance 42
8.8 Measured energy performance reporting 42

9 Overall assessment of the energy performance of buildings 42
9.1 Categorization of building and/or spaces 42
9.2 Combination of building services included in EPB in each space 43
9.3 Useful floor area and air volume 44
9.4 Normalization to building size 44
9.4.1 Reference size 44
9.4.2 Normalization 45
9.4.3 Reference floor area 45
9.5 Assessment boundary and perimeters 45
9.5.1 General principles 45
9.5.2 Assessment boundary for multiple buildings 47
9.6 Overall energy performance 47
9.6.1 Weighted overall energy balance 47
9.6.2 Primary energy factors 48
9.6.3 Greenhouse gas emission factors 49
9.6.4 Additional weighting factors 50
9.6.5 Costs factors 50
9.6.6 Weighting factors for exported energy 50
9.6.7 Energy flows 53
9.7 Share of renewable energy 53
9.8 Energy performance indicators for technical building systems 54
9.9 Calculation methods for energy performance indicators per part of a building and/or service 54

10 Zoning 55
10.1 General 55
10.2 Thermal zones and service areas 56
10.3 Spaces 57
10.4 Zoning rules 59
10.4.1 Principle 59
10.4.2 Specific zoning criteria 59
10.5 Assignment rules 60
10.5.1 Subdivision 60
10.5.2 Recombination 63
10.6 Zoning procedure 63

11 Calculation of the energy performance, routing and energy balance 63
11.1 General 63
11.2 Overall calculation procedure (steps) 64
11.3 Calculation principles of the recovered gains and losses 64
11.3.1 General 64
11.3.2 Detailed approach 65
11.3.3 Simplified approach 66
11.4 Effect of building automation and control (BAC) and technical building management (TBM) 66
11.5 Climatic and external environment data 67
11.6 Overall energy performance 67
11.6.1 General 67
11.6.2 Electricity and other energy carriers with exportation 67
11.6.3 Energy carriers without exportation 72
11.6.4 Exported heat produced on-site and not included in thermal use of the building 73

12 Common overarching output **74**
12.1 General 74
12.2 Tabulated overview of the amounts of energy per energy carrier and energy service 75
Annex A (normative) **Input and method selection data sheet — Template** **82**
Annex B (informative) **Input and method selection data sheet — Default choices** **93**
Annex C (normative) **Common subscripts** **111**
Annex D (informative) **Calculation of measured energy performance** **120**
Annex E (normative) **Calculation methods for energy performance indicators per part of a building and/or service** **122**
Annex F (informative) **Alphabetical index of terms** **129**
Annex G (informative) **Electrical grid related indicators** **132**
Annex H (informative) **Proposal of indicators for the assessment of nearly Zero-Energy Buildings (NZEB)** **133**
Bibliography **136**
