## Controlled equivalence ratio method for the determination of hazardous components of fire effluents - Steady-state tube furnace

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>2</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>2</b>
<b>4</b>	<b>Principle .....</b>	<b>3</b>
<b>5</b>	<b>Apparatus .....</b>	<b>4</b>
5.1	General apparatus .....	4
5.2	Tubular furnace .....	4
5.3	Calibrated thermocouples .....	6
5.4	Quartz furnace tube .....	6
5.5	Combustion boat .....	6
5.6	Combustion boat drive .....	7
5.6.1	Mechanism .....	7
5.6.2	Rate of specimen introduction .....	7
5.7	Mixing and measurement chamber .....	8
5.8	Analysis of gases .....	8
5.9	Determination of smoke aerosols .....	10
5.10	Exhaust system .....	10
<b>6</b>	<b>Air supplies .....</b>	<b>10</b>
6.1	Primary and secondary air supplies .....	10
6.2	Primary airflow calibration .....	10
6.3	Secondary airflow calibration .....	11
6.4	Overall confirmation .....	11
<b>7</b>	<b>Establishment of furnace temperature and setting of furnace temperature .....</b>	<b>11</b>
7.1	General .....	11
7.2	Establishing furnace temperature profile to determine furnace suitability .....	12
7.3	Setting the temperature for an individual test run condition .....	12
<b>8</b>	<b>Test specimen preparation .....</b>	<b>13</b>
8.1	Test specimen form .....	13
8.2	Combustible loading .....	13
8.3	Specimen conditioning .....	13
<b>9</b>	<b>Selection of test decomposition conditions .....</b>	<b>13</b>
9.1	Selection of decomposition conditions for fire hazard analysis or fire safety engineering13 9.2 Stage 1b): oxidative pyrolysis from externally applied radiation .....	14
9.3	Stage 2: well-ventilated flaming .....	14
9.4	Stage 3a): small vitiated fires in closed or poorly ventilated compartments .....	15
9.5	Stage 3b): post-flashover fires in open compartments .....	16
<b>10</b>	<b>Procedure .....</b>	<b>16</b>
10.1	Safety considerations .....	16

10.2	Decomposition of the test specimen .....	16
10.3	Steady-state period .....	18
10.4	Sampling and analysis of fire effluent .....	18
10.4.1	General .....	18
10.4.2	Sampling of fire effluent .....	18
10.4.3	Determination of the mass of the specimen residue .....	20
10.4.4	Ambient conditions .....	20
10.5	Validity of test run .....	21
11	Calculations .....	21
11.1	General .....	21
11.2	Mass-charge concentration and mass-loss concentration .....	21
11.2.1	Mass-charge concentration .....	21
11.2.2	Mass-loss concentration .....	21
11.3	Yield .....	22
11.4	Organic fraction .....	24
12	Test report .....	24
12.1	of test report .....	24
12.2	Test laboratory details .....	25
12.3	Specimen details .....	25
12.4	Test conditions and procedures .....	25
13	Verification of test apparatus with PMMA .....	26
13.1	Procedure .....	26
13.2	Verification criteria .....	26
14	Trueness and uncertainties with respect to steady-state tube furnace concentration and yields .....	26
14.1	Accuracy, trueness and uncertainty .....	26
14.2	Accuracy and trueness of concentration and yield measurements in the steady- state tube furnace (SSTF) .....	26
14.3	Extent of variability of concentration and yield measurements from test specimens in the steady-state tube furnace .....	27
14.4	Correlation of effluent yields from the steady-state tube furnace with those obtained from large-scale compartment fire tests under the same combustion conditions .....	27
15	Repeatability and reproducibility .....	28
Annex A (informative) Guidance on the choice of additional decomposition conditions .....		30
Annex B (informative) Estimation of lethal toxic potency for combustion products according to ISO 13344 using tube-furnace data .....		32
Annex C (informative) Application of data from the tube-furnace test to estimation and assessment of toxic hazard in fires according to ISO 13571 .....		33
Annex D (informative) Use of the tube-furnace method for bioassay purposes .....		34
Annex E (informative) Measurement of optical density from the steady-state tube furnace .....		35
Annex F (informative) Comparison of data from the steady-state tube furnace, the ISO 9705 room and other compartment fire experiments .....		37
Annex G (informative) Assessment of mass-loss rate data .....		41
Bibliography .....		46
