DIN EN 16883:2017-08 (E)

Conservation of cultural heritage - Guidelines for improving the energy performance of historic buildings

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6
3.1 Terms related to buildings 6
3.2 Terms related to heritage 8
3.3 Terms related to documentation 11
3.4 Terms related to energy 11

4 General considerations 13
4.1 Introduction 13
4.2 Principles of building conservation 13
4.3 Qualification requirements 14
4.4 Sustainable management of historic buildings 15
4.5 Existing building envelope and technical systems 15
4.6 User behaviour 15

5 Overview of the procedure 15

6 Initiating the planning process 16

7 Building survey and assessment 17
7.1 Introduction 17
7.2 Building information 17
7.3 Describing heritage significance and conservation opportunities and constraints 17
7.4 Assessment of the use of the building 18
7.5 Documenting the building`s structural type and its components, its condition and associated environmental influences 18
7.6 Energy performance assessment 18
7.7 Indoor environmental assessment 19

8 Specifying the objectives 20

9 Deciding if improvement of energy performance is needed 20

10 Assessment and selection of measures for improving energy performance 20
10.1 Introduction 20
10.2 Assessment criteria and scale 21
10.3 Compile a long list of measures 22
10.4 Exclude inappropriate measures 23
10.5 Assess remaining measures 23
10.6 Select packages of measures 23
10.7 Assess in relation to targets 23

11 Implementation, documentation and evaluation of improvement measures 23
11.1 Introduction 23

11.2 Implementation 23
11.3 Documentation 24
11.4 Post-occupancy evaluation 24
Annex A (informative) Example of template for building information 25
A.1 Building information 25
A.2 Legal information 25
A.3 Building description 25
A.4 Defining heritage significance and conservation opportunities and constraints 26
A.5 Assessment of past and present use and intended future use 26
A.6 Mapping building's technical structure, condition and environmental influences 26
A.7 Energy performance assessment 27
A.8 Indoor environmental assessment 27
A.9 Sources and management information 27
Annex B (informative) Example of assessment table 28
Annex C (informative) Alphabetical index of terms 30
Bibliography 31
