DIN EN 12697-10:2018-03 (E)

Bituminous mixtures - Test methods - Part 10: Compactability

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Principle 5

5 Apparatus 5
5.1 Impact compaction 5
5.2 Gyratory compaction 5
5.3 Vibratory compaction 6

6 Test procedure 6
6.1 Impact compaction 6
6.1.1 Different specimens for each level of compaction energy, recording increases in density 6
6.1.2 One specimen for all levels of compaction energy, recording decreases in thickness 6
6.2 Gyratory compaction 6
6.3 Vibratory compaction 6

7 Calculation and expression of results 7
7.1 Impact compaction 7
7.1.1 Different specimens for each level of compaction energy, recording increases in density 7
7.1.2 Same specimen for all levels of compaction energy, recording decreases in thickness 9
7.2 Gyratory compaction 10
7.3 Vibratory compaction 11

8 Test report 11

9 Precision 11
9.1 Impact compaction 11
9.1.1 General 11
9.1.2 One specimen for all levels of compaction energy, recording decreases in thickness 12
9.2 Gyratory compaction 12
9.3 Vibratory compaction 12
