

DIN EN 1436:2018-03 (Englisc h)

Road marking materials - Road marking performance for road users and test methods

Contents		Page
European foreword		4
Introduction		6
1	Scope	7
2	Normative references	7
3	Terms and definitions	7
4	Requirements	8
4.1	General	8
4.2	Reflection in daylight or under road lighting	9
4.2.1	General	9
4.2.2	Luminance coefficient under diffuse illumination Qd	9
4.2.3	Luminance factor	10
4.3	Retroreflection under vehicle headlamp illumination	10
4.4	Colour	12
4.4.1	Chromaticity in daylight	12
4.4.2	Chromaticity of retroreflected light	13
4.5	Skid resistance	14
Annex A (normative)	Measurement method for the luminance coefficient under diffuse illumination Qd	15
A.1	Introduction	15
A.2	Spectral match	16
A.3	Standard measuring condition of measuring equipment	16
A.4	Practical applications of measuring equipment	17
A.5	Calibration of measuring equipment	18
A.6	Uncertainty of measurement	18
Annex B (normative)	Measurement method for the coefficient of retroreflected luminance RL	20
B.1	Introduction	20
B.2	Spectral match of measuring equipment	21
B.3	Standard measuring condition of measuring equipment	21
B.4	Practical applications of measuring equipment	22
B.4.1	General	22
B.4.2	Portable instruments	22
B.4.3	Vehicle mounted instruments	23
B.5	Calibration of measuring equipment	25
B.6	Condition of wetness	25
B.7	Condition of rain	26
B.8	Uncertainty of measurement	26
Annex C (normative)	Measuring method for the luminance factor and the chromaticity co-ordinates x and y	28
C.1	Standard measuring condition for the measurement of the luminance factor and the chromaticity co-ordinates x and y in daylight	28

C.2	Standard measuring condition for the measurement of the chromaticity co-ordinates x and y of retroreflected light	28
C.3	Measuring equipment	28
C.4	Uncertainty of measurement	28
	Bibliography	29
