ISO 12631:2017-06 (E)

Thermal performance of curtain walling - Calculation of thermal transmittance

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Symbols and subscripts 3
4.1 Symbols 3
4.2 Subscripts 3
4.3 Superscripts 3

5 Description of the methods 3
5.1 Output of the method 3
5.2 General description 4
5.3 Geometrical characteristics 4
5.3.1 Main principles 4
5.3.2 Internal depth 6
5.3.3 Boundaries of curtain wall structures 7
5.3.4 Cut-off planes and partitioning of thermal zones 10

6 Methodologies for the calculation of curtain wall transmittance 10

7 Single assessment method 12
7.1 Output data 12
7.2 Calculation time intervals 12
7.3 Input data 12
7.3.1 Geometrical characteristics 12
7.3.2 Thermal characteristics 16
7.4 Calculation procedure 18
7.4.1 Applicable time interval 18
7.4.2 Calculation of thermal transmittance 18

8 Component assessment method 19
8.1 Output data 19
8.2 Calculation time intervals 19
8.3 Input data 19
8.3.1 Geometrical characteristics 19
8.3.2 Thermal characteristics 23
8.4 Calculation procedure 26
8.4.1 Applicable time interval 26
8.4.2 Calculation of thermal transmittance 26

9 Report 27
9.1 of report 27
9.2 Drawings 28
9.2.1 Section drawings 28
9.2.2 Overview drawing of the whole curtain wall element 28
9.3 Values used in the calculation 28

9.4 Presentation of results 28

Annex A (normative) Input and method selection data sheet -- Template 29

Annex B (informative) Input and method selection data sheet -- default choices 31

Annex C (normative) Regional references in line with ISO Global Relevance Policy 33

Annex D (normative) Linear thermal transmittance of junctions 34

Annex E (normative) A method for calculating the thermal effect of screws using a 2D numericalmethodandtheproceduresspecifiedinISO10077-2 41

Annex F (normative) Ventilated and unventilated air spaces 44

Bibliography 47
