DIN EN 13200-3:2018-12 (E)

Spectator facilities - Part 3: Separating elements - Requirements

Contents

Page

European foreword ... 4
Introduction ... 5
1 Scope ... 6
2 Normative references ... 6
3 Terms and definitions ... 6
4 General requirements ... 8
4.1 Preliminary considerations ... 8
4.2 Design procedures ... 8
4.3 Barrier design and loading ... 8
4.4 Barrier heights ... 8
4.5 Deflection ... 9
4.6 Fixings ... 9
4.7 Safety details ... 9
4.8 Support from adjacent construction ... 9
4.9 Maintenance ... 9
4.10 Barriers and sightline considerations ... 9
5 Specific requirements ... 10
5.1 General ... 10
5.2 External perimeter barriers ... 10
5.3 Activity area barriers ... 10
5.3.1 Form, height and imposed load ... 10
5.3.2 Emergency access to the activity area ... 10
5.3.3 Requirements dependent upon sports or activities ... 10
5.4 Segregation elements ... 11
5.5 Crush barriers ... 12
5.5.1 Main design criteria ... 12
5.5.2 Crush barriers - factors determining the horizontal imposed load ... 12
5.6 Barriers in spectator galleries ... 13
5.7 Exit doors and gates ... 13
5.7.1 General ... 13
5.7.2 Loads ... 13
5.8 Temporary barriers ... 13
5.9 Front of stage barriers ... 14
Annex A (normative) Horizontal imposed loads for barriers in seating accommodation ... 15
A.1 Table and figures ... 15
A.2 Notes to Annex A ... 20
A.3 Notes to Table A.1 ... 21
Annex B (informative) Horizontal imposed loads for barriers in standing accommodation ... 22
B.1 Table and figures ... 22
B.2 Notes to Annex B ... 23

Annex C (informative) **Horizontal imposed loads for external perimeter barrier and segregation elements** **24**

C.1 Table and figures **24**

C.2 Notes to Annex C **26**

Annex D (informative) **Breaking of load related to grade slope** **27**
