# DIN EN ISO 14689:2018-05 (E)

## Geotechnical investigation and testing - Identification, description and classification of rock (ISO 14689:2017)

## Contents

Page

**European foreword** ... **3**

**Foreword** ... **4**

**Introduction** ... **5**

**1 Scope** ... **6**

**2 Normative references** ... **6**

**3 Terms and definitions** ... **6**

**4 Identification and description of rocks** ... **8**
4.1 General ... 8
4.2 Rock identification ... 8
4.3 Geological formation and age ... 9

**5 Rock material description** ... **9**
5.1 Colour ... 9
5.2 Grain size ... 10
5.3 Unconfined compressive strength ... 10
5.4 Weathering and alteration effects ... 11
5.5 Carbonate content ... 12
5.6 Degradation of rock material ... 12

**6 Rock mass description** ... **12**
6.1 General ... 12
6.2 Rock types ... 13
6.3 Structure and bedding ... 13
6.4 Discontinuities ... 13
6.4.1 General ... 13
6.4.2 Measurement of discontinuity orientation ... 14
6.4.3 Discontinuity spacing ... 15
6.4.4 Rock block shapes in three dimensions ... 15
6.4.5 Persistence of discontinuities ... 16
6.4.6 Roughness ... 16
6.4.7 Aperture ... 17
6.4.8 Infilling ... 18
6.4.9 Seepage ... 18
6.4.10 Joint sets ... 18
6.5 Weathering of the rock mass ... 18

**7 Fracture indices in cores** ... **19**

**8 Rock mass classification** ... **20**

**9 Reporting** ... **21**

**Annex A** (informative) **Aid to identification of rocks on the basis of geological features for engineering purposes** ... **22**

**Annex B** (informative) **Classification of weathering of rocks (material and mass)** ... **23**

**Annex C** (informative) **Description of discontinuities in three dimensions** ... **25**

**Bibliography** ... **26**
