

# DIN EN 16907-4:2019-04 (E)

## Earthworks - Part 4: Soil treatment with lime and/or hydraulic binders

---

| <b>Contents</b> |  | <b>Page</b> |
|-----------------|--|-------------|
|                 | European foreword .....  | 6           |
|                 | Introduction .....   | 7           |
| <b>1</b>        | <b>Scope .....</b>   | <b>9</b>    |
| <b>2</b>        | <b>Normative references .....</b>  | <b>9</b>    |
| <b>3</b>        | <b>Terms and definitions .....</b>   | <b>11</b>   |
| <b>4</b>        | <b>Symbols and abbreviations .....</b>                                       | <b>14</b>   |
| <b>5</b>        | <b>Constituents .....</b>  | <b>15</b>   |
| 5.1             | Materials .....  | 15          |
| 5.1.1           | General .....  | 15          |
| 5.1.2           | Natural soils and processed aggregates .....                                 | 15          |
| 5.1.3           | Low strength, intermediate strength and high strength rocks, and chalk ..... | 15          |
| 5.1.4           | Recycled materials .....   | 15          |
| 5.1.5           | Artificial materials .....   | 15          |
| 5.2             | Binders .....  | 15          |
| 5.2.1           | Cement .....   | 15          |
| 5.2.2           | Fly ash .....  | 16          |
| 5.2.3           | Slag .....   | 16          |
| 5.2.4           | Hydraulic road binder .....  | 16          |
| 5.2.5           | Lime .....   | 16          |
| 5.2.6           | Blends .....   | 16          |
| 5.3             | Water .....  | 16          |
| 5.4             | Other constituents .....   | 16          |
| <b>6</b>        | <b>Mixtures .....</b>  | <b>16</b>   |
| 6.1             | General .....  | 16          |
| 6.2             | Proportioning .....  | 16          |
| <b>7</b>        | <b>Laboratory testing methodology .....</b>                                  | <b>17</b>   |
| 7.1             | General .....  | 17          |
| 7.2             | Identification tests .....   | 17          |
| 7.2.1           | Identification of the materials to be treated .....                          | 17          |
| 7.2.2           | Identification of the binders .....  | 17          |
| 7.3             | Feasibility of treatment .....   | 17          |
| 7.4             | Workability period .....   | 18          |
| 7.5             | Characteristics for execution .....  | 18          |
| 7.5.1           | Improvement .....  | 18          |
| 7.5.2           | Stabilization .....  | 18          |
| 7.6             | Mechanical performance .....   | 19          |
| 7.6.1           | Curing conditions .....  | 19          |
| 7.6.2           | Resistance to water .....  | 19          |
| 7.6.3           | Strength for direct construction trafficking .....                           | 19          |
| 7.6.4           | Resistance to frost .....  | 19          |
| 7.6.5           | Performance classification testing .....                                     | 19          |
| 7.6.6           | Other performance tests .....  | 20          |
| 7.7             | Preparation of the specimens .....   | 20          |
| 7.7.1           | Particle size of the material .....  | 20          |

|       |  |    |
|-------|--|----|
| 7.7.2 | Production of the mixtures .....                                       | 20 |
| 7.7.3 | Dimensions of the specimens.....                                       | 20 |
| 7.7.4 | Compaction procedures .....  | 20 |
| 7.7.5 | Curing.....  | 21 |
| 7.8   | Content of the laboratory studies .....                                | 21 |
| 7.8.1 | General .....  | 21 |
| 7.8.2 | Identification of the constituents.....                                | 21 |
| 7.8.3 | Improvement.....   | 21 |
| 7.8.4 | Stabilization.....   | 21 |
| 7.9   | Laboratory testing report.....   | 22 |
| 8     | Performance classification of the mixtures .....                       | 23 |
| 8.1   | General .....  | 23 |
| 8.2   | Improvement.....   | 23 |
| 8.2.1 | General .....  | 23 |
| 8.2.2 | Immediate bearing index.....   | 24 |
| 8.2.3 | Moisture condition value .....   | 24 |
| 8.2.4 | Degree of compaction.....  | 24 |
| 8.2.5 | Swelling .....   | 25 |
| 8.3   | Stabilization.....   | 25 |
| 8.3.1 | Requirements for the fresh mixture .....                               | 25 |
| 8.3.2 | Laboratory mechanical performance classification .....                 | 28 |
| 8.3.3 | Resistance to water.....   | 32 |
| 8.3.4 | Strength for direct construction trafficking.....                      | 34 |
| 8.3.5 | Resistance to frost .....  | 34 |
| 8.3.6 | Other performance.....   | 34 |
| 9     | Execution and control .....  | 34 |
| 9.1   | Introduction.....  | 34 |
| 9.1.1 | General .....  | 34 |
| 9.1.2 | Prerequisites.....   | 34 |
| 9.2   | Preliminary engineering check .....                                    | 35 |
| 9.2.1 | General .....  | 35 |
| 9.2.2 | Site investigation .....   | 35 |
| 9.2.3 | Sulfide, sulfate, organic matter and other deleterious materials ..... | 35 |
| 9.2.4 | Influential parameters.....  | 36 |
| 9.2.5 | Prior laboratory testing .....   | 36 |
| 9.3   | Binders .....  | 36 |
| 9.4   | Soil treatment plant types .....                                       | 36 |
| 9.5   | Soil improvement .....   | 37 |
| 9.5.1 | General .....  | 37 |
| 9.5.2 | Materials suitable for improvement.....                                | 37 |
| 9.5.3 | Improvement during excavation .....                                    | 37 |
| 9.5.4 | Improvement in fill area .....   | 37 |
| 9.5.5 | Binder spreading .....   | 37 |
| 9.5.6 | <i>In situ</i> mixing.....   | 38 |
| 9.5.7 | Compaction .....   | 38 |
| 9.5.8 | Protection of the works .....  | 38 |
| 9.5.9 | Climatic considerations.....   | 38 |
| 9.6   | Soil stabilization.....  | 38 |
| 9.6.1 | General .....  | 38 |
| 9.6.2 | Material suitable for stabilization .....                              | 39 |
| 9.6.3 | Soil preparation .....   | 39 |
| 9.6.4 | Stabilization processes for capping and embankment.....                | 40 |

|   |  |    |
|---|--|----|
| 9.6.5   | Other applications .....   | 42 |
| 9.6.6   | Layer Interface and organization of the work .....                           | 42 |
| 9.7   | Testing and Compliance.....  | 43 |
| 9.7.1   | Specification.....   | 43 |
| 9.7.2   | Compliance tests and records.....  | 43 |
| 9.7.3   | Completion reports .....   | 45 |
| 9.8   | Climatic and practical considerations .....                                  | 46 |
| Annex A (informative) Production of test specimens for treated materials .....  |  | 47 |
| A.1   | Introduction .....   | 47 |
| A.2   | Sampling.....  | 47 |
| A.3   | Water content.....   | 47 |
| A.4   | Maximum size of the particles.....   | 47 |
| A.5   | Treatment .....  | 48 |
| A.6   | Mellowing and compaction of the treated material in the specimen mould ..... | 49 |
| A.7   | Curing and storage.....  | 49 |
| A.8   | Removing sample from the mould.....  | 50 |
| A.9   | Reporting .....  | 51 |
| Annex B (informative) Loading speed for the strength and modulus tests .....  |  | 52 |
| Annex C (informative) Non destructive seismic test method for mechanical performance .....  |  | 54 |
| C.1   | Introduction .....   | 54 |
| C.2   | Scope .....  | 54 |
| C.3   | Test apparatus.....  | 54 |
| C.4   | Definitions and theoretical approach.....                                    | 55 |
| C.5   | Principle of test method .....   | 56 |
| C.6   | Significance and use .....   | 56 |
| C.7   | Measurement.....   | 57 |
| C.8   | References .....   | 59 |
| Annex D (informative) Example of evaluation of performance variability of treated soil as a result of variation during implementation Binder percentage adjustment and method for compensating it ..... |  | 60 |
| Annex E (informative) Examples of age of classification and curing regimes for mechanical performance of treated materials for earthworks .....   |  | 62 |
| Annex F (informative) Other performance characteristics for treated materials.....  |  | 63 |
| Annex G (informative) Field and laboratory identifications of common sulfide and sulfate minerals.....  |  | 64 |
| G.1   | Field Identification .....   | 64 |
| G.2   | Laboratory Identification.....   | 64 |
| G.3   | References .....   | 65 |
| Annex H (informative) Soil Treatment Plant Types .....  |  | 66 |

|   |  |    |
|---|--|----|
| H.1   | General .....  | 66 |
| H.2   | Binder storage units .....   | 66 |
| H.3   | Binder spreading units .....   | 66 |
| H.4   | Soil preparation plant.....  | 67 |
| H.5   | <i>In situ</i> mixing plant .....  | 67 |
| H.6   | Fixed or semi mobile mixing plants.....  | 69 |
| H.7   | Water bowsers.....   | 71 |
| H.8   | Compaction plant.....  | 71 |
| Annex I (informative) Treatment sequence and processes .....  |  | 72 |
| Annex J (informative) Other applications for stabilized materials .....   |  | 78 |
| J.1   | General .....  | 78 |
| J.2   | Filling in narrow places.....  | 78 |
| J.3   | Construction of lower layers in high embankments built with water sensitive soils or<br>evolutive rocks which may be subject to occasional flooding..... | 79 |
| J.4   | Steepened slopes of embankment.....  | 79 |
| J.5   | Slope repairs.....   | 80 |
| J.6   | Reinforced slopes .....  | 80 |
| J.7   | Foundations .....  | 80 |
| J.8   | Load transfer platforms .....  | 80 |
| J.9   | Water retaining structures .....   | 81 |
| J.10  | Contaminated soils.....  | 81 |
| Annex K (informative) Site Stabilization checklist.....   |  | 82 |
| Annex L (informative) Safety considerations .....   |  | 85 |
| L.1   | General .....  | 85 |
| L.2   | Specific protective equipment .....  | 85 |
| Annex M (informative) Climatic and practical considerations .....   |  | 86 |
| M.1   | General .....  | 86 |
| M.2   | Weather.....   | 86 |
| M.3   | Binder dust emission.....  | 87 |
| M.4   | Run off and leachate .....   | 88 |
| Annex N (informative) Method and charts to determine the quantity of lime needed to<br>reach a targeted IPI value ..... |  | 89 |
