

# DIN EN 1279-1:2018-10 (E)

## Glass in Building - Insulating glass units - Part 1: Generalities, system description, rules for substitution, tolerances and visual quality

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
<b>1</b>	<b>Scope .....</b>	<b>6</b>
<b>2</b>	<b>Normative references .....</b>	<b>6</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>7</b>
<b>4</b>	<b>Symbols and abbreviations for edge seal .....</b>	<b>14</b>
<b>5</b>	<b>Requirements .....</b>	<b>15</b>
5.1	General .....	15
5.2	Glass panes/components .....	16
5.2.1	General .....	16
5.2.2	Basic glasses .....	16
5.2.3	Special basic glasses .....	16
5.2.4	Strengthened glasses .....	16
5.2.5	Thermally toughened safety glasses .....	17
5.2.6	Laminated glasses .....	17
5.2.7	Coated glasses .....	17
5.2.8	Surface worked glass .....	17
5.2.9	Curved glass .....	17
5.3	Cavity fillings .....	18
5.4	Cavity inserts .....	18
5.5	Shapes .....	18
<b>6</b>	<b>Requirements .....</b>	<b>18</b>
6.1	Durability of insulating glass units .....	18
<b>Annex A (normative) System description of insulating glass units .....</b>		<b>22</b>
<b>Annex B (normative) Examples of insulating glass unit systems .....</b>		<b>23</b>
B.1	General .....	23
B.2	Organic sealed insulating glass units with rigid hollow spacer .....	23
B.3	Insulating glass units sealed by hot applied flexible spacer incorporating desiccant .....	23
B.4	Insulating glass units with prefabricated flexible spacer .....	24
B.5	Organic sealed insulating glass units with U-channel shaped spacer incorporating desiccant matrix .....	25
B.6	Air filled insulating glass units sealed by a metal strip between the glass panes .....	27
<b>Annex C (informative) Compatibility of components within an insulating glass unit system .....</b>		<b>28</b>
C.1	Compatibility .....	28
C.2	Diffusion and equilibrium .....	28
C.3	Contact .....	28
C.4	Interaction .....	28
C.5	Factors affecting compatibility .....	28
<b>Annex D (normative) Rules to substitute materials and components, possible changes within components and addition in the system description .....</b>		<b>30</b>

D.1	General comments .....	30
D.2	Tables of possibilities to substitute materials and components, and of possible changes within components .....	30
D.3	Addition of components .....	35
D.3.1	Addition of cavity inserts without change of the permeation barrier design .....	35
D.3.2	Addition of cavity inserts with change of the permeation barrier design .....	35
Annex E (informative) Edge seal strength comparison in case of substituting outer sealant .....		36
Annex F (normative) Visual quality of insulating glass units .....		37
F.1	General .....	37
F.2	Observation conditions .....	37
F.3	Insulating glass unit made of two panes of monolithic glass .....	38
F.3.1	Spot faults .....	38
F.3.2	Residues .....	39
F.3.3	Linear / extended fault .....	39
F.4	Insulating glass units other than made of two monolithic glass panes .....	39
F.5	Insulating glass unit containing a heat treated glass .....	40
F.6	Edge defects .....	40
F.7	Tolerance on spacer straightness .....	40
F.8	Curved insulating glass units .....	41
Annex G (informative) Other visual aspects of insulating glass units .....		42
G.1	General .....	42
G.2	Inherent colour .....	42
G.3	Difference in insulating glass unit colour .....	42
G.4	Interference effect .....	42
G.5	Specific effect due to barometric conditions .....	42
G.6	Multiple reflections .....	42
G.7	Anisotropy (iridescence) .....	43
G.8	Condensation on the external surface of the insulating glass unit .....	43
G.9	Wetting of glass surfaces .....	43
Bibliography .....		44
