ISO 18747-1:2018-03 (E)

Determination of particle density by sedimentation methods - Part 1: Isopycnic interpolation approach

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols 2

5 Basic principle of method 2

6 Measuring techniques to determine the direction of gravitational and centrifugal migration of dispersed particles 4

7 Preparation of samples 5
7.1 Solutions 5
7.2 Dispersing procedure 6

8 Measurements 7

9 Data analysis 7
9.1 General 7
9.2 Graphical interpolation 8
9.3 Two point interpolation 8
9.4 Linear or non-linear fit 9

10 Reference materials and measurement uncertainty 10
10.1 Reference materials 10
10.2 Measurement uncertainty 10

Annex A (informative)Discriminationbetweensedimentationorcreaming/flotationby bottom focused backscattering intensity 12

Annex B (informative) Determination based on measurement of direct migration velocity 15

Annex C (informative) Linearization of migration velocity versus density plots 22

Annex D (informative) Buoyant density centrifugation 24

Annex E (informative) Propagation of uncertainty for isopycnic velocity in the case of linear interpolation according to Formula (4) 25

Bibliography 27
