Determination of particle density by sedimentation methods - Part 1: Isopycnic interpolation approach

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols	2
5 Basic principle of method	2
6 Measuring techniques to determine the direction of gravitational and centrifugal migration of dispersed particles	4
7 Preparation of samples	5
7.1 Solutions	5
7.2 Dispersing procedure	6
8 Measurements	7
9 Data analysis	7
9.1 General	7
9.2 Graphical interpolation	8
9.3 Two point interpolation	8
9.4 Linear or non-linear fit	9
10 Reference materials and measurement uncertainty	10
10.1 Reference materials	10
10.2 Measurement uncertainty	10
Annex A (informative) Discrimination between sedimentation or creaming/ flotation by bottom focused backscattering intensity	12
Annex B (informative) Determination based on measurement of direct migration velocity	15
Annex C (informative) Linearization of migration velocity versus density plots	22
Annex D (informative) Buoyant density centrifugation	24
Annex E (informative) Propagation of uncertainty for isopycnic velocity in the case of linear interpolation according to Formula (4)	25
Bibliography	27
