

ISO 19426-3:2018 (E)

Structures for mine shafts — Part 3: Sinking stages

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Symbols
5	Materials
5.1	Steel
5.1.1	Structural steel grades
5.1.2	High strength steel grades
5.2	Aluminium alloys
6	Nominal loads
6.1	Permanent load
6.2	Imposed loads
6.2.1	Stage deck load
6.2.2	Shaft formwork winch load
6.2.3	Kibble cross-head support load
6.2.4	Jumbo unit load
6.2.5	Lashing unit load
6.2.6	Stage jack load
6.2.7	Stage skid load
6.2.8	Canopy load
6.2.9	Kibble guide load
6.2.10	Temporary stage support load
6.2.11	Blast load
6.2.12	Guard railing load
6.2.13	Special load
6.3	Emergency load
6.3.1	Emergency rope load
6.3.2	Emergency impact load
7	Design procedures
7.1	Design loads
7.2	Design codes
7.3	Load reversal
7.4	Design of replaceable members
7.5	Impact energy design of top deck
7.6	Deflection limitations
Annex A	(informative) Load factors and load combinations
A.1	General
A.2	Operating conditions
A.2.1	Partial load factors and load combination factors
A.2.2	Load combinations
A.3	Emergency conditions
Annex B	(informative) Examples of jumbo unit loads

- B.1 Operating loads**
- B.2 Distribution of loads onto stage structure**

Annex C (informative) Examples of lashing unit loads

- C.1 Lashing unit with cactus grab**
- C.2 VSM lashing unit**
- C.2.1 Operational loads**
- C.2.2 Distribution of loads onto stage structure**

Annex D (informative) Examples of stage jack loads with lashing

- D.1 General**
- D.2 Multi-level stage having a structure which resists horizontal forces**
- D.3 Single-level stage or stage suspended from cross beams on a ledge**
