

ISO/TS 19021:2018-05 (E)

Test method for determination of gas concentrations in ISO 5659-2 using Fourier transform infrared spectroscopy

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	Apparatus for combustion of test specimen and for cone radiator calibration	2
6	Gas sampling system	2
6.1	General arrangement	2
6.2	Sampling probe	3
6.3	Main filter	4
6.4	Sampling line before gas cell	4
6.5	Secondary filter	4
6.6	FTIR gas cell	5
6.7	Conditioning of sampling flow and pump capacity	5
6.8	Sampling flow rate	5
6.9	FTIR Spectrometer	5
7	Calibrations	6
7.1	General calibrations	6
7.2	Chamber leakage test	6
7.3	Gas analyser calibration	6
8	Conditioning	6
9	Test environment	7
10	Pre-test conditions	7
11	Test procedure	7
11.1	Principle	7
11.2	Operation before each test	7
11.3	Operation during a test	8
11.4	Operation after each test	9
12	Gas species analysis and correction	9
12.1	General	9
12.2	Calculation of corrected volume fraction	9
12.3	Calculation of time shift	10
13	Test report	10
14	Test precision	11

Annex A (informative) Typical FTIR calibration procedure at commissioning or after major changes	12
Annex B (informative) Accuracy (trueness and precision) of the test method	15
Bibliography	23
