ISO 1920-5:2018 (E)

Testing of concrete — Part 5: Density and water penetration depth

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Determination of density of hardened concrete

- 4.1 General
- 4.2 Apparatus
- 4.3 Test specimens
- 4.4 Procedures
- 4.4.1 General
- 4.4.1.1 Calibration of the apparatus
- 4.4.1.2 Determination of mass
- 4.4.1.3 Determination of volume
- 4.4.2 Mass of as#received specimen
- 4.4.3 Mass of water#saturated specimen
- 4.4.4 Mass of oven#dried specimen
- 4.4.5 Volume obtained by water displacement
- 4.4.5.1 General
- 4.4.5.2 Mass in water
- 4.4.5.3 Mass in air
- 4.4.5.4 Calculation of volume
- 4.4.6 Volume, using actual measurements
- 4.4.7 Volume, using checked designated dimensions
- 4.4.8 Test result

5 Determination of water penetration under pressure

- 5.1 Principle
- 5.2 Apparatus
- 5.3 Test specimen
- 5.4 Procedure
- 5.4.1 Preparation and conditioning of the test specimen
- 5.4.2 Application of water pressure
- 5.4.3 Examination of specimen
- 5.5 Test result

6 Test report

- 6.1 General
- 6.2 Test report for density
- 6.3 Test report for water penetration depth

Annex A (informative) Precision for the method of determination of the density

Annex B (informative) Example of test reports

- B.1 Example of test report of the density of hardened concrete
- B.2 Example of test report of depth of water penetration
