ISO 22477-5:2018 (E)

Geotechnical investigation and testing — Testing of geotechnical structures — Part 5: Testing of grouted anchors

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and symbols

4 Equipment

- 4.1 Test loading set-up
- 4.2 Reaction system
- 4.3 Loading device
- 4.4 Load measurement
- 4.5 Displacement measurement
- 4.6 Time and temperature measurement

5 Test types

- 5.1 General
- 5.2 Investigation test
- 5.3 Suitability test
- 5.4 Acceptance test

6 Execution

- 6.1 Test location
- 6.2 Test anchors
- 6.3 Time period between installation and test
- 6.4 Test preparation
- 6.5 Proof load
- 6.6 Datum load
- 6.7 Group testing
- 6.8 Alternating load testing

7 Test report

- 7.1 Investigation and suitability tests
- 7.2 Acceptance test

8 Test Method 1

- 8.1 General
- 8.2 Investigation test
- 8.2.1 General
- 8.2.2 Loading procedure
- 8.2.3 Measurements and checks
- 8.2.4 Test results
- 8.3 Suitability test
- 8.3.1 General
- 8.3.2 Loading procedure
- 8.3.3 Measurements and checks
- 8.3.4 Test results
- 8.4 Acceptance test
- 8.4.1 General
- 8.4.2 Loading procedure

8.4.3 Measurements and checks
8.4.4 Test results

9 Test Method 2

9.1 General
9.2 Investigation test
9.2.1 General
9.2.2 Loading procedure
9.2.3 Measurements and checks
9.2.4 Test results
9.3 Suitability test
9.3.1 General
9.3.2 Loading procedure
9.3.3 Measurements and checks
9.3.4 Test results
9.4 Acceptance test
9.4.1 General
9.4.2 Loading procedure
9.4.3 Measurements and checks
9.4.4 Test results

10 Test Method 3

10.1 General
10.2 Investigation test
10.2.1 General
10.2.2 Loading procedure
10.2.3 Measurements and checks
10.2.4 Test results
10.3 Suitability test
10.3.1 General
10.3.2 Loading procedure
10.3.3 Measurements and checks
10.3.4 Test results
10.4 Acceptance test
10.4.1 General
10.4.2 Loading procedure
10.4.3 Measurements and checks
10.4.4 Test results

Annex A (informative) Determination of the creep rate α

Annex B (informative) Determination of the load loss kl

B.1 Permissible cumulative loss of load kl
B.2 Investigation test
B.3 Suitability test
B.4 Acceptance test

Annex C (informative) Determination of the critical creep load Pc

Annex D (informative) Evaluation of the apparent tendon free length Lapp

D.1 General
D.2 Calculation of Lapp and determination of friction loss for Test Method 3

Annex E (informative) Yield stress and tensile strength for typical anchor steels
