European foreword 6

Introduction 7

1 Scope 8

2 Normative references 8

3 Terms and definitions 8

4 Principle 11

5 Equipment 11

6 Interferences and sources of error 11

7 Procedure 12
7.1 Key concepts 12
7.1.1 General 12
7.1.2 Specification of analytical requirements 13
7.1.3 Specification of sequence of operations 13
7.1.4 Choice of appropriate procedures 13
7.2 Sequence of treatment techniques 13

8 Report 15

Annex A (normative) Guideline for choosing sample treatment techniques 16

A.1 General 16
A.2 Drying 16
A.2.1 General information 16
A.2.2 Air drying at room temperature 16
A.2.2.1 When to use it 16
A.2.2.2 When not to use it 17
A.2.2.3 Procedure 17
A.2.3 Oven drying at 40 °C 17
A.2.3.1 When to use it 17
A.2.3.2 When not to use it 17
A.2.3.3 Procedure 17
A.2.4 Oven drying at 105 °C 17
A.2.4.1 When to use it 17
A.2.4.2 When not to use it 18
A.2.4.3 Procedure 18
A.2.5 Freeze-drying 18
A.2.5.1 When to use it 18
A.2.5.2 When not to use it 18
A.2.5.3 Procedure 18
A.2.6 Chemical drying 18
A.2.6.1 General 18

A.2.6.2 When to use it 18
A.2.6.3 When not to use it 18
A.2.6.4 Procedure 19
A.3 Size reduction 19
A.3.1 General information 19
A.3.2 Cutting and coring of monolithic, sheet-like and plate-like construction products 19
A.3.2.1 General 19
A.3.2.2 Cutting 19
A.3.2.2.1 When to use it 19
A.3.2.2.2 When not to use it 20
A.3.2.2.3 Procedure 20
A.3.2.3 Freeze cutting 20
A.3.2.3.1 When to use it 20
A.3.2.3.2 When not to use it 20
A.3.2.3.3 Procedure 20
A.3.2.4 Coring 20
A.3.2.4.1 When to use it 20
A.3.2.4.2 When not to use it 20
A.3.2.4.3 Procedure 21
A.3.3 Size reduction of granular construction products 21
A.3.3.1 Crushing and grinding 21
A.3.3.1.1 When to use it 21
A.3.3.1.2 When not to use it 21
A.3.3.1.3 Procedure 21
A.3.3.2 Freeze crushing 21
A.3.3.2.1 When to use it 21
A.3.3.2.2 When not to use it 22
A.3.3.2.3 Procedure 22
A.3.3.3 Milling 22
A.3.3.3.1 When to use it 22
A.3.3.3.2 When not to use it 22
A.3.3.3.3 Procedure 22
A.4 Homogenization 22
A.4.1 General information 22
A.4.2 Manual homogenization 23
A.4.2.1 When to use it 23
A.4.2.2 When not to use it 23
A.4.2.3 Procedure 23
A.4.3 Mechanical homogenization 23
A.4.3.1 When to use it 23
A.4.3.2 When not to use it 23
A.4.3.3 Procedure 23
A.4.4 Homogenization in case of volatile compounds 23
A.5 Sub-sampling 24
A.5.1 General information 24
A.5.2 Manual division of solid samples by coning and quartering 24
A.5.2.1 When to use it 24
A.5.2.2 When not to use it 25
A.5.2.3 Procedure 25
A.5.3 Mechanical division of solid samples 25
A.5.3.1 When to use it 25
A.5.3.2 When not to use it 25
A.5.3.3 Procedure 26
A.5.4 Sub-sampling for determination of volatile compounds 26
A.5.4.1 General 26
A.5.4.2 When to use it 26
A.5.4.3 When not to use it 26
A.5.4.4 Procedure 26
A.5.5 Sub-sampling for moderately volatile organic compounds 26
A.5.5.1 When to use it 26
A.5.5.2 When not to use it 26
A.5.5.3 Procedure 27

A.6 Storage 27

Annex B (informative) Relationship between minimum amount of (sub-)sample and particle size 28

B.1 Equation for the estimation of the minimum amount of (sub-)sample 28
B.1.1 General 28
B.1.2 Example: determining the fraction of particles with the property of interest 28
B.1.3 Example: estimating the minimum amount of sample 29
B.2 Empirical rule 29

Annex C (informative) Sample treatment equipment 31

Annex D (informative) Examples of analytical methods for content and leaching 32

Annex E (informative) Examples of preparation of test samples 34

E.1 Example 1: Dry matter content, leaching and analysis for pH, Cr, Cu, Mo and Zn 34
E.1.1 General 34
E.1.2 Choice of methods and specification of amount and characteristics of test portions 34
E.1.3 Specification of amount and characteristics of the different test samples 37
E.2 Example 2: Dry matter content, TOC, loss on ignition, Cd, Hg, Pb, PCB, leaching and analysis for pH, conductivity, Cd, Hg, Pb, Cl, sulphate and TOC 38
E.2.1 General 38
E.2.2 Choice of methods and specification of amount and characteristics of test portions 38
E.2.3 Specification of amount and characteristics of the different test samples 39
E.2.4 Define the sequence of operations 40
