ISO 19624:2018 (E)

Bamboo structures — Grading of bamboo culms — Basic principles and procedures

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 General

5.1 Grading
5.2 Grades
5.3 Graded bamboo culms
5.4 Grading operations
5.5 Secondary properties

6 Visual grading

6.1 General
6.2 Visual grading requirements
6.2.1 General
6.2.2 Condition properties
6.2.2.1 Insect and fungal damage
6.2.2.2 Fissures and longitudinal indentation
6.2.3 Geometric properties
6.2.3.1 Diameter
6.2.3.1.1 Average diameter over culm length
6.2.3.1.2 Smallest average diameter
6.2.3.1.3 Smallest absolute diameter
6.2.3.2 Wall thickness
6.2.3.2.1 Average wall thickness over culm length
6.2.3.2.2 Smallest average wall thickness
6.2.3.3 Internode length
6.2.3.3.1 Average of all internode lengths
6.2.3.3.2 Average of top and bottom internode lengths
6.2.3.4 Length
6.2.3.5 External taper
6.2.3.6 Internal taper
6.2.3.7 Bow
6.2.3.8 Ovality
6.3 Other requirements for visual grading
6.3.1 Moisture content
6.3.2 Age at harvesting
6.4 Check on visual grading process

7 Machine grading

7.1 General
7.2 Machine grading process requirements
7.3 Indicating properties
7.4 Grade-determining properties
7.5 Visual override

7.6 Hybrid grading methods

8 Structural properties of graded bamboo

8.1 General
8.2 Initial evaluation
8.2.1 Developing visual grading rules
8.2.2 Developing grading settings for machine grading
8.2.3 Sampling
8.2.4 Sample size for initial evaluation
8.2.5 Other considerations during initial evaluation testing
8.3 Periodic evaluation
8.4 Reduced test programmes and secondary properties

9 Product identification

10 Documentation

Annex A (informative) Example of application of clauses in this document to a visual grading standard for bamboo culms based on external diameter and flexural properties

A.1 General
A.1.1 Hypothetical example
A.2 Symbols
A.2.1 General notation
A.2.2 Subscripts
A.2.3 Grades
A.2.4 Graded bamboo culms
A.2.5 Secondary properties
A.2.5.1 Fissures and longitudinal indentation
A.2.5.2 Wall thickness
A.2.5.3 External taper and internal taper
A.2.5.4 Bow
A.2.5.5 Ovality
A.2.6 Indicating properties
A.2.7 Grade-determining properties
A.2.8 Hybrid grading methods
A.2.8.1 Developing visual grading rules
A.2.8.2 Developing grading settings for machine and hybrid grading
