ISO 21022:2018 (E)

Test method for fibre-reinforced cementitious composites — Load-deflection curve using circular plates

Contents

Foreword

1 Scope

2 Normative reference

3 Terms and definitions

4 Symbols

5 Test specimens

5.1 Geometry
5.2 Fabrication of specimens

6 Testing machine and measuring devices

6.1 Testing machine
6.2 Loading fixtures for concentric ring testing
6.2.1 General
6.2.2 Loading and support rings
6.2.3 Compliant layer and friction elimination
6.3 Alignment
6.4 Measuring device for loads
6.5 Measuring device for deflection
6.6 Data acquisition

7 Test procedure

7.1 Preparation and positioning of specimens
7.2 Loading
7.3 Assessment of fracture patterns

8 Calculations

9 Test report
