DIN EN 13036-5:2020-06 (E)

Road and airfield surface characteristics - Test methods - Part 5: Determination of longitudinal unevenness indices

Contents

Page

European foreword 3

Introduction 3

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and abbreviations 8

5 Calculation of evenness indices 8

6 International Roughness Index (IRI) 10
6.1 General 10
6.2 Representation of the obtained results 11

7 Wave band analysis 11
7.1 General 11
7.2 Wave band indices 12

8 Weighted Longitudinal Profile (WLP) analysis 12
8.1 General 12
8.2 Prerequisites 12

9 Reporting 13

Annex A(normative) Calculation of the IRI 14

Annex B(informative) Example code for IRI calculation 18

Annex C(informative) Wave band analysis using bi-octave bands and RMS 20

Annex D(informative) Wave band analysis using LPV over selected wavelengths 42

Annex E(informative) Calculation of the WLP 45

Annex F(informative) Indicator implementation check 52
