DIN 18008-1:2020-05 (E)

Glass in Building - Design and construction rules - Part 1: Terms and general bases

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions, symbols and units 8
3.1 Terms and definitions 8
3.2 Symbols 9

4 Construction materials 9
4.1 Glass 9
4.1.1 Products 9
4.1.2 Material properties 10
4.1.3 Strength properties and fracture pattern 10
4.1.4 Edge damage 10
4.2 Interlayers in contact with the glass 10

5 Safety concept 11
5.1 General 11
5.2 Verification by testing 11
5.3 Construction technique-related requirements 11

6 Actions 11
6.1 External loads 11
6.2 Insulating glass units 11
6.2.1 Pressure differences 11
6.2.2 Combinations of actions 12

7 Determination of stresses and deformations 13
7.1 General 13
7.2 Shear interaction 13
7.3 Insulating glass units 13

8 Verification of structural resistance and serviceability 13
8.1 General 13
8.2 Design values 13
8.3 Ultimate limit states 14
8.4 Serviceability limit states 15

9 Verification of residual load-bearing capacity 16
9.1 General 16
9.2 Structural provisions and verifications 16

10 General structural provisions 16
10.1 Glass support 16
10.2 Glass drill holes and recesses 16

Annex A (informative) Designations of glass products 17

A.1 General 17
A.2 Single glass pane 17
A.3 Insulating glass unit 17
A.4 Glazing 18

Annex B (normative) Verification by testing to ensure compliance with construction technique-specific requirements 19

B.1 Verification of residual load-bearing capacity by testing 19
B.1.1 Test conditions and test set-up 19
B.1.2 Procedure 19
B.1.3 Test report 21
B.2 Conditions for non-application of verification by testing 21

Annex C (informative) Explanation of climatic action values 22

C.1 Combinations of action "summer" 22
C.1.1 Installation conditions 22
C.1.2 Conditions of production 22
C.2 Combinations of action "winter" 22
C.2.1 Installation conditions 22
C.2.2 Conditions of production 23
