

# ISO/TR 23932-2:2020-03 (E)

## Fire safety engineering - General principles - Part 2: Example of a dry-cleaning store

---

	Contents	Page
Foreword .....	iv	
Introduction .....	v	
1 Scope .....	1	
2 Normative references .....	1	
3 Terms and definitions .....	1	
4 Objective .....	1	
5 Example of FSE process applied to a dry-cleaning store .....	1	
5.1 Scope of the project concerning FSE process (ISO 23932-1:2018, Clause 5) .....	1	
5.2 Identification of fire safety objectives (ISO 23932-1:2018, Clause 6) .....	7	
5.2.1 Safety of life .....	7	
5.2.2 Conservation of property .....	7	
5.3 Identification of functional requirements (ISO 23932-1:2018, Clause 7) .....	8	
5.3.1 Occupant protection .....	8	
5.3.2 Protection of neighbours .....	8	
5.3.3 Protection of fire fighters .....	8	
5.3.4 Property protection .....	8	
5.4 Selection of risk analysis approach (ISO 23932-1:2018, Clause 8) .....	8	
5.5 Identification of performance criteria (ISO 23932-1:2018, Clause 9) .....	8	
5.5.1 Protection of occupants of the shop .....	8	
5.5.2 Protection of neighbours .....	9	
5.5.3 Protection of fire fighters .....	9	
5.5.4 Property protection .....	9	
5.6 Fire safety design plan (ISO 23932-1:2018, Clause 10) .....	9	
5.6.1 Development of the proposed solution .....	9	
5.6.2 Description of the management of fire safety .....	11	
5.6.3 Design proposal .....	11	
5.7 Fire and behavioural scenarios (ISO 23932-1:2018, Clause 11) .....	14	
5.7.1 Hazard identification .....	14	
5.7.2 Fire scenarios .....	14	
5.7.3 Behavioural scenarios .....	17	
5.8 Selection of engineering methods (ISO 23932-1:2018, Clause 12) .....	18	
5.9 Scenario-based evaluation of trial design (ISO 23932-1:2018, Clause 13) .....	18	
5.9.1 Quantification of design fire scenarios .....	18	
5.9.2 Comparison with performance criteria .....	40	
5.10 Conditions of use of the built environment (ISO 23932-1:2018, 14.3) .....	41	
5.10.1 Operating conditions .....	41	
5.10.2 Levels and required control frequency .....	42	
Bibliography .....	43
