ISO 23658:2020 (E)

Buildings and civil engineering works — Sealants — Testing of adhesion properties using a bead peel test

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Sample preparation

5.1 General
5.2 Materials, substrates and surface treatment
5.3 Sealant application
5.3.1 Method without mold
5.3.2 Method with mold

6 Conditioning of the sealants

7 Ageing simulation

8 Peel test procedure

9 Evaluation

10 Test report

Annex A (informative) Example of conditioning and aging methods and example of expression of the results

Page count: 9
