DIN EN ISO 22476-9:2021-01 (E)

Geotechnical investigation and testing - Field testing - Part 9: Field vane test (FVT and FVT-F) (ISO 22476-9:2020)

Contents

Page

European foreword ... **4**

Foreword ... **5**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms, definitions and symbols ... **7**
3.1 Terms and definitions ... 7
3.2 Symbols ... 10

4 Equipment and configurations ... **12**
4.1 Test equipment ... 12
4.1.1 Vane and vane shaft ... 12
4.1.2 Friction reducer ... 13
4.1.3 Slip coupling ... 13
4.1.4 Extension rods, protective casings, protection shoe ... 13
4.1.5 Rotation unit ... 14
4.1.6 Equipment for measuring rotation and torque ... 14
4.2 Test configurations ... 14

5 Selection of equipment and test configuration ... **16**
5.1 Selection of equipment ... 16
5.2 Selection of test configuration ... 17

6 Test procedure ... **18**
6.1 Equipment checks and calibrations ... 18
6.2 Position and inclination of thrust machine ... 18
6.3 Test depths ... 18
6.4 Internal friction torque reading prior to testing ... 18
6.5 Methods for reaching the level for insertion of the vane ... 18
6.6 Insertion of the vane ... 20
6.7 External friction torque reading ... 21
6.8 Vane shear test ... 21
6.9 Internal friction torque reading after the test ... 22

7 Test results ... **22**

8 Reporting ... **23**
8.1 General ... 23
8.2 Reporting of test results ... 23
8.2.1 General information ... 23
8.2.2 Location of the test ... 24
8.2.3 Test equipment ... 24
8.2.4 Test procedure ... 24
8.2.5 Test results ... 25
8.3 Presentation of test plots ... 25

Annex A (informative) **Test phases** **26**
Annex B (informative) **Example of field report for field vane test** **27**
Annex C (normative) **Maintenance, checks and calibration** **29**
Annex D (informative) **Uncertainties in field vane testing** **32**
Annex E (normative) **General interpretation and explanation for tapered and rectangular vanes with H/D ratios differing from 2** **34**
Annex F (informative) **Interpretation and explanation for a rectangular vane with rounded corners** **37**
Annex G (informative) **Calculation of test depth corrected for inclination** **39**
Annex H (informative) **Example of estimation of post-peak behaviour** **40**
Bibliography **41**
