DIN EN 17352:2022-08 (E)

Power operated pedestrian entrance control equipment - Safety in use - Requirements and test methods

Contents

Page

European foreword 5

Introduction 6

1 Scope 7

2 Normative references 8

3 Terms and definitions 8

4 List of significant hazards 10
4.1 General 10
4.2 Crushing, shearing and drawing-in hazards 10
4.3 Impact and trapping hazards 11
4.4 Hazards caused by source of energy and power controls 11
4.5 Hazards caused by inadequate functional safety 11
4.6 Hazards caused by manual operation 11
4.7 Hazards caused by loss of stability 12
4.8 Hazards caused by glazing material 12
4.9 Hazards caused by modification of settings 12
4.10 Hazards caused by imprisonment 12
4.11 Hazards caused by shape of the equipment 12
4.12 Hazards caused by maintenance 12

5 Safety requirements and/or protective/risk reduction measures 12
5.1 General 12
5.2 Crushing, shearing and drawing-in 13
5.2.1 General 13
5.2.2 Safety distances 13
5.2.3 Guards 20
5.2.4 Low energy mode of operation 21
5.2.5 Electro-Sensitive Protective Equipment (ESPE) 22
5.3 Impact and trapping 22
5.4 Source of energy and power controls 22
5.5 Inadequate functional safety 23
5.6 Manual operation 23
5.7 Loss of stability 24
5.8 Glazing material 25
5.9 Modification of settings 25
5.10 Imprisonment 25
5.11 Shape of the equipment 25
5.12 Maintenance 26
5.13 Use in escape routes and emergency exits 26

6 Verification of the safety requirements and/or protective/risk reduction measures 26
6.1 General 26
6.2 Crushing, shearing and drawing-in 26
6.2.1 General 26
6.2.2 Safety distances 26
6.2.3 Guards 27
6.2.4 Low energy mode of operation 27

6.2.5 Electro-Sensitive Protective Equipment (ESPE) ... 27
6.2.6 Limitation of forces ... 27
6.3 Impact and trapping ... 27
6.4 Source of energy and power controls ... 27
6.5 Functional safety ... 27
6.6 Manual operation ... 27
6.7 Loss of stability ... 28
6.8 Glazing material ... 28
6.9 Modification of settings ... 28
6.10 Imprisonment ... 28
6.11 Shape of the equipment ... 28
6.12 Maintenance ... 28
6.13 Use in escape routes and emergency exits ... 28

7 Information for use ... 28
7.1 General ... 28
7.2 Instruction handbook ... 28
7.3 Marking ... 30

Annex A (normative) Power operated pedestrian entrance control equipment to be used in escape routes and emergency exits ... 31

A.1 General ... 31
A.2 Functional safety ... 31
A.3 Electrical power supply ... 31
A.4 Break out function ... 31
A.5 Locking systems for the break out function ... 32
A.6 Device to release the electric locking mechanism of the break-out function ... 32
A.7 Operating mode selection ... 32
A.8 Durability ... 33

Annex B (normative) Reference test body ... 34

Annex C (normative) Limitation of forces ... 37

C.1 Permissible dynamic forces ... 37
C.2 Permissible static forces ... 38
C.3 Impact force measuring equipment ... 38
C.4 Impact force measuring points ... 39

Annex D (normative) Stability measuring points ... 42

Annex E (informative) Maintenance documentation ... 43

Annex F (informative) Examples of product variations ... 44

F.1 Turnstile variations ... 44
F.2 Swing lane variations ... 45
F.3 Retractable lane variations ... 45

Annex G (informative) Example of calculation of the Mass Moment of Inertia ... 46

Annex H (informative) Relationship between hazards, hazardous situations and hazardous events covered by this standard and relevant requirements and test methods subclauses ... 51

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2006/42/EC aimed to be covered ... 52

Bibliography ... 54
