Fire safety engineering — Verification and validation protocol for building fire evacuation models

Contents

| | |
|---------|--------------------------------------------------------------------------|
| | Foreword |
| | Introduction |
| 1 | Scope |
| 2 | Normative references |
| 3 | Terms and definitions |
| 4 | Documentation |
| 4.1 | General |
| 4.2 | Technical documentation |
| 4.3 | User's manual |
| 5 | Verification |
| 5.1 | General |
| 5.2 | Basic components |
| 5.3 | Behavioural components |
| 5.4 | Fire-people interaction components |
| 5.5 | Building-specific components |
| 6 | Validation |
| 6.1 | General |
| 6.2 | Methods for the analysis of results |
| 6.3 | Component validation |
| 6.4 | Global validation |
| 7 | Review of the theoretical and experimental basis of probabilistic models |
| 8 | Quality assurance |
| 9 | Quantification of uncertainty |
| 10 | Acceptance criteria |
| Annex A | (informative) Reporting Template |
| Annex B | (informative) Examples of application |
