

# DIN CEN/TR 17439:2021-05 (E)

## Guidance on how to implement EN ISO 19650-1 and -2 in Europe

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Symbols and abbreviations .....	7
5	Explanation of vocabulary .....	7
5.1	Appointment, appointing and appointed parties .....	7
5.1.1	Appointment .....	7
5.1.2	Appointing party .....	7
5.1.3	Appointed party .....	8
5.2	Information requirements .....	8
5.2.1	Introduction .....	8
5.2.2	Information Requirement (IR) .....	8
5.2.3	Exchange Information Requirements (EIR) .....	9
5.2.4	Task Information Requirements (TIR) .....	9
5.3	BIM Execution Plan (BEP) .....	9
5.4	Information Delivery Plans .....	9
5.5	Information model .....	10
5.6	Information container .....	10
5.7	Federation .....	11
5.8	Common data environment (CDE) .....	11
6	Explanation of concepts and principles .....	11
6.1	Appointment, appointing and appointed parties .....	11
6.2	Information management function .....	12
6.3	Information delivery .....	13
6.4	Information checking during information exchange .....	14
6.5	Flexibility in how the different parties and teams may be set up to enable information delivery according to EN ISO 19650 .....	15
6.6	Families of information requirements and information models .....	16
6.7	Level of Information Need .....	18
6.8	Federation strategy .....	18
6.9	How to implement Task Information Delivery Plan (TIDP) and Master Information Delivery Plan (MIDP) .....	19
6.10	Common Data Environment .....	20
6.11	Collaborative production of information .....	21
6.12	Information delivery cycle .....	22
7	Explanation of EN ISO 19650-2 process .....	25
7.1	Concept of process .....	25
7.2	Scalability to small and medium projects .....	26
7.3	Illustration of different aspects of EN ISO 19650-2 process using a number of different scenarios .....	27
7.3.1	The client (as the appointing party) and the supply chain are aware and motivated and use EN ISO 19650 .....	27

7.3.2	The client is not aware of/or does not use EN ISO 19650 i.e. How to implement without client participation .....	27
7.3.3	The appointing party is not the client .....	27
7.3.4	The delivery team is either a small and simple structure or a large and complex structure but is delivering a similar project .....	28
7.3.5	Explanation of the EN ISO 19650-2 process: The delivery team will continue through to operation and maintenance .....	31
7.4	The project is mid - size and EN ISO 19650 is used for optimizing costs and the delivery phase .....	33
8	Examples of implementing the EN ISO 19650-2 process .....	34
8.1	Introduction .....	34
8.2	The supply chain is not aware of/or does not use EN ISO 19650 .....	34
8.2.1	Introduction .....	34
8.2.2	The collaboration with Building Information Models .....	35
8.2.3	Appointing the parties in the digital collaboration .....	37
8.2.4	Planning the digital collaboration .....	39
8.2.5	Collaborative production of information and construction .....	41
8.2.6	Project close-out and handover .....	42
8.3	The project is complex with a range of different stakeholders and demanding schedules with a multiple delivery teams .....	43
8.3.1	Introduction .....	43
8.3.2	The digital capability and capacity .....	44
8.3.3	Description of project to design a public access building for the appointing party's overall rail improvement programme, following the Information management process during the delivery phase of assets from EN ISO 19650-2 .....	44
8.3.4	Summary .....	50
8.4	The project is small and straight forward and EN ISO 19650 seems too much effort .....	50
8.4.1	First example of Implementing the EN ISO 19650-2 process: The project is small and straight forward and EN ISO 19650 seems too much effort .....	50
8.4.2	Second example of Implementing the EN ISO 19650-2 process: The project is small and straight forward and EN ISO 19650 seems too much effort .....	55
8.5	Example of Implementing the EN ISO 19650-2 process: CDE-scenario demonstrating the spatial coordination of information models with other information models existing within the infrastructure Project's Common Data Environment (CDE) .....	60
8.5.1	Introduction .....	60
8.5.2	The collaborative production of Information Models in the Common Data Environment (CDE) .....	60
8.5.3	Collaborative production of information and construction .....	62
8.5.4	Project close-out and handover .....	63
