

ISO/TS 19488:2021 (E)

Acoustics — Acoustic classification of dwellings

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
3.1	General
3.2	Classes and single-number quantities to express building performance
4	Acoustic classes
5	Classification criteria
5.1	General requirements
5.2	Airborne sound insulation
5.3	Impact sound insulation
5.4	Airborne sound insulation against exterior noise (traffic, industry and other sources)
5.5	Sound from building service equipment
5.6	Reverberation time and sound absorption in stairwells and access areas
6	Verification
Annex A	(informative) Verification of conformity with an acoustic class
A.1	General
A.2	Verification of conformity with criteria for an acoustic class
A.2.1	Procedure A: Verification by calculations, visual inspections and field measurements
A.2.2	Procedure B: Verification by field measurements only
A.2.3	Verification of an entire building
A.2.4	Verification of individual dwellings or acoustic characteristic
A.3	Contents of verification report for classification of a dwelling or a building
A.4	Classification examples
Annex B	(informative) Explanation of intent of classes
