ISO 17889-1:2021 (E)

Ceramic tiling systems — Sustainability for ceramic tiles and installation materials — Part 1: Specification for ceramic tiles

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

3.1 Sustainability
3.2 Environment
3.3 Materials input
3.4 Sustainability management
3.5 Products and production
3.6 Waste materials
3.7 Health and safety

4 Symbols and abbreviated terms

4.1 Symbols
4.2 Abbreviated terms

5 Principle criteria for sustainable products

5.1 General
5.2 Environmental criteria
5.3 Economic and functional criteria
5.4 Social criteria

6 Assessment

6.1 General
6.2 Environmental criteria
6.2.1 General
6.2.2 Raw materials
6.2.2.1 General
6.2.2.2 Requirements for the evaluation
6.2.2.2.1 Materials records
6.2.2.2.2 Transport – Indigenous raw materials
6.2.2.2.3 Recycled and/or reclaimed waste content
6.2.2.2.4 Raw materials and outsourced services environmental buying agreement
6.2.3 Manufacture
6.2.3.1 General
6.2.3.2 Requirements for the evaluation
6.2.3.2.1 Environmental management system (EMS)
6.2.3.2.2 Energy efficiency management system (EEMS)
6.2.3.2.3 Cogeneration or combined heat and power systems
6.2.3.2.4 Heat recovery systems
6.2.3.2.5 Renewable energy usage (solar, hydro-electric, wind, marine, or geothermal)
6.2.3.2.6 Fuel type used
6.2.3.2.7 Specific fuel consumption for firing kilns
6.2.3.2.8 PM emission factor through emissions into the atmosphere
6.2.3.2.9 Fluorides emission factor from firing emissions into the atmosphere
6.2.3.2.10 Process waste recycle/reuse factor
6.2.3.2.11 Internal or external reuse/recycling of packaging materials
6.2.3.2.12 Reuse/recycling or separate collection of other materials

6.2.3.2.13 Specific fresh water consumption
6.2.3.2.14 Waste water discharge
6.2.4 Distribution and installation
6.2.4.1 General
6.2.4.2 Requirements for the evaluation: Packaging
6.2.4.2.1 Weight of packaging
6.2.4.2.2 Recycled materials content of packaging materials
6.2.4.2.3 Environmental property of packaging materials
6.2.4.3 Requirements for the evaluation: installation
6.2.4.3.1 Environmentally friendly installation - Guidance from manufacturer
6.2.5 Use
6.2.5.1 General
6.2.5.2 Requirements for the evaluation
6.2.5.2.1 Environmentally friendly routine maintenance/service of ceramic tiling – Ceramic tiles
6.2.5.2.2 Product VOC emission criteria
6.2.6 End of life
6.2.6.1 General
6.2.6.2 Requirements for the evaluation
6.2.6.2.1 Environmentally friendly demolition of ceramic tiling
6.2.7 Product environmental mark/labelling
6.2.7.1 General
6.2.7.2 Requirements for the evaluation:
6.2.7.2.1 External Type I
6.3 Economic and functional criteria
6.3.1 General
6.3.2 Product quality, performance level, fitness for use
6.3.2.1 General
6.3.2.2 Requirements for the evaluation
6.3.2.2.1 Product compliance with the relevant product standards and manufacturer declarations

6.4 Social criteria
6.4.1 General
6.4.2 Occupational health and safety in manufacture
6.4.2.1 General
6.4.2.2 Requirements for the evaluation
6.4.2.2.1 Information of the workers about the exposure risks to chemical and physical agents
6.4.2.2.2 Dust suction line(s) with particulate filtration in each of the relevant section of the production unit
6.4.2.2.3 Periodic audits (number of aspects periodically audited)
6.4.2.2.4 Personal protective equipment (PPE)
6.4.2.2.5 Occupational health and safety management system (OHSMS)
6.4.2.2.6 Raw materials and outsourced services health and safety buying agreement
6.4.3 Health and safety prior and during installation
6.4.3.1 General
6.4.3.2 Requirements for the evaluation
6.4.3.2.1 Information provided to the tile merchants and installers
6.4.3.2.2 Materials safety data sheets
6.4.4 Health and safety in use
6.4.4.1 General
6.4.4.2 Requirements for the evaluation
6.4.4.2.1 Information provided to the user on user friendly tiling
6.4.5 Labour agreement
6.4.5.1 General
6.4.5.2 Requirements for the evaluation
6.4.5.2.1 Raw materials and outsourced services labour-buying agreement

7 Classification and designation

7.1 Approach
7.2 Final rating calculation
7.3 Classification
7.4 Final report

Annex A (normative) Criteria for sustainable products

A.1 Requirements

A.2 Indigenous raw materials: geographical example of calculation
A.3 VOC Emission method
A.4 Scoring tool – ceramic tiles
